

CASE: Maison de Retraite - PREPROCESS MODULE OUTPUT

LEVEL 0

1. Vocabulary Extraction

- Main entrance
- Reception area
- Dining hall
- Kitchen
- Staff offices
- Service rooms (e.g., storage, laundry)
- Vertical circulation (stairs, elevator)

2. Quantity Estimation

- Main entrance × 1
- Reception area × 1
- Dining hall × 1
- Kitchen × 1
- Staff offices × approx. 2
- Service rooms × approx. 3
- Vertical circulation × approx. 2

3. Spatial Relationship Descriptions

- The entrance leads directly to the reception, forming a primary access core.
- The dining hall is adjacent to the kitchen for efficient food distribution.
- Staff and service areas are grouped for operational functionality.
- Vertical circulation elements are located at both ends of the plan.

4. Overall Spatial Impression

The ground level acts as a public and operational core, with clearly segmented zones for reception, dining, and service logistics, ensuring streamlined access and service efficiency.

LEVEL 1

1. Vocabulary Extraction

- Resident rooms
- Common lounge
- Nursing station
- Vertical circulation

2. Quantity Estimation

- Resident rooms × approx. 10
- Common lounge × 1
- Nursing station × 1
- Vertical circulation × approx. 2

3. Spatial Relationship Descriptions

- Resident rooms are aligned along double-loaded corridors.
- The common lounge is centrally located to promote social interaction.
- The nursing station is positioned near circulation nodes for quick access.
- Vertical cores connect directly to shared and service areas.

4. Overall Spatial Impression

The first floor is organized around resident well-being and staff responsiveness, balancing private

living quarters with shared social and care spaces.

LEVEL 2

1. Vocabulary Extraction

- Resident rooms
- Common lounge
- Terrace
- Vertical circulation

2. Quantity Estimation

- Resident rooms × approx. 10
- Common lounge × 1
- Terrace × 1
- Vertical circulation × approx. 2

3. Spatial Relationship Descriptions

- Similar layout to Level 1, with resident rooms along corridors.
- The common lounge opens to an outdoor terrace, enhancing daylight and natural contact.
- Circulation is vertical and central, ensuring efficient movement across floors.

4. Overall Spatial Impression

The second floor extends the domestic and care-oriented layout, with the addition of outdoor access via terraces to foster a more therapeutic and pleasant environment.

GLOBAL DESIGN COMPONENTS

P2 - Photographic/Rendering Analysis

Design Vocabulary Extraction:

- Wooden louvers, glass façade, green roof, courtyard, overhangs

Atmospheric Description:

- A soft, warm ambiance is achieved through natural wood textures, transparent façades, and landscaped roofs.

Spatial Composition/Hierarchy:

- Modular volumes arranged around courtyards create rhythm and accessible circulation paths.

Design Intent Reading:

- Emphasizes humane elderly care through biophilic design, daylight access, and modular clarity.

Contextual Relationship:

- The building integrates with the suburban setting, using vegetation and roof greenery to harmonize with the landscape.

P3 - Detail and Diagram Interpretation

Detail Elements:

- Façade detailing, louver system, structural modules, circulation diagrams

Interpretation:

- Architectural detailing reveals an emphasis on sustainability and constructability. Louvers are key

passive shading elements. Circulation diagrams confirm a separation between resident and service flows, optimizing functionality.
