

Level 1

1. Vocabulary Extraction

- Entrance lobby
- Rehabilitation clinic
- Waiting area
- Physiotherapy room
- Barrier-free toilet
- Elevator
- Stairwell
- Double-height space

2. Quantity Estimation

- Entrance lobby × 1
- Rehabilitation clinic × 1
- Waiting area × 1
- Physiotherapy room × 1
- Barrier-free toilets × approximately 2
- Elevator × 1
- Stairwell × 1
- Double-height space × 1

3. Spatial Relationship Descriptions

- The entrance lobby leads directly into the waiting area and physiotherapy space.
- Barrier-free toilets are positioned close to the primary clinic zones for accessibility.
- The elevator and stairwell are centrally located to serve vertical circulation needs.
- The double-height space links to upper levels and improves interior brightness and scale.

4. Overall Spatial Impression

The first level operates as a healthcare gateway with efficient circulation and universal accessibility, emphasizing openness and patient-centered service design.

Level 2

1. Vocabulary Extraction

- Elderly day-care center
- Care units
- Therapeutic garden
- Terrace
- Seating areas
- Barrier-free corridors
- Elevator
- Stairwell

2. Quantity Estimation

- Care units × approximately 2
- Therapeutic garden × 1
- Terrace × 1
- Seating areas × multiple
- Barrier-free corridors × several
- Elevator × 1
- Stairwell × 1

3. Spatial Relationship Descriptions

- Care units are arranged around the therapeutic garden, allowing direct visual and spatial connection.

- The terrace extends from interior care areas, offering access to fresh air and sun exposure.
- Seating areas are distributed along corridors and open areas to encourage rest and interaction.
- Vertical circulation is maintained via a core stairwell and elevator cluster.

4. Overall Spatial Impression

The second floor fosters a therapeutic and social environment tailored for the elderly, where garden-centered layouts promote healing and casual encounters.

Level 3

1. Vocabulary Extraction

- Talent cultivation center
- Classrooms
- Multipurpose activity room
- Therapeutic garden
- Terrace
- Barrier-free pathways
- Elevator
- Stairwell

2. Quantity Estimation

- Classrooms × approximately 2-3
- Multipurpose room × 1
- Therapeutic garden × 1
- Terrace × 1
- Barrier-free pathways × several
- Elevator × 1
- Stairwell × 1

3. Spatial Relationship Descriptions

- Classrooms and multipurpose rooms are organized adjacent to the therapeutic garden.
- The terrace provides an outdoor spillover space for educational and recreational use.
- Circulation paths interconnect indoor and outdoor areas without barriers, promoting inclusiveness.

4. Overall Spatial Impression

This floor supports learning and social integration, using therapeutic landscaping and flexible rooms to balance education, wellness, and community engagement.

Level 4

1. Vocabulary Extraction

- Kitchen
- Dining hall
- Landscape courtyard
- Full-height windows
- Elevator
- Stairwell
- Barrier-free circulation

2. Quantity Estimation

- Kitchen × 1
- Dining hall × 1
- Landscape courtyard × 1
- Full-height windows × multiple
- Elevator × 1
- Stairwell × 1

- Barrier-free circulation × full coverage

3. Spatial Relationship Descriptions

- The kitchen is directly connected to the dining hall, forming a compact service loop.
- Dining space opens onto a landscaped courtyard through full-height windows.
- Circulation spaces are open and inclusive, facilitating wheelchair access across all zones.

4. Overall Spatial Impression

The top floor emphasizes communal dining and natural connection, using landscape and transparent boundaries to enhance conviviality and openness.
