

CASE 11 - ARCHITECTURAL LEVEL ANALYSIS

Level 1

1. Vocabulary Extraction

- Gate ball court
- Toilets
- Video hall
- Dressing rooms
- Cold storage
- Storage rooms
- Cooking classrooms (including cook rooms & noodle room)
- Dining hall
- Stage control room
- Dance hall
- Equipment store
- Entrance hall
- Main hall
- Saloon
- Colored pond
- Rest platform

2. Quantity Estimation

- Toilets × 4
- Cooking/cook rooms × 5
- Storage / Cold storage × 4
- Dining hall × 1
- Entrance halls × 2
- Dance hall × 1
- Gate ball court × 1
- Colored ponds × 2
- Rest platform × 1

3. Spatial Relationship Descriptions

- Kitchen and cooking classrooms are clustered in the southeast zone adjacent to the dining hall.
- Entrance halls lead into multipurpose spaces like the dance hall and main hall.
- Cold storage and equipment rooms are near service zones for operational efficiency.
- Rest platforms and colored ponds mediate transitions between public spaces and activity areas.

4. Overall Spatial Impression

The first floor serves as a multifunctional public base with strong emphasis on culinary education, social activities, and recreational programming integrated via clear spatial transitions from the entrances.

Level 2

1. Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Public lounges

2. Quantity Estimation

- Residential units × approx. 10
- Corridors × 2

- Stairwells × 2
- Elevators × 2
- Public lounge × 1

3. Spatial Relationship Descriptions

- Double-loaded corridors organize residential units on both sides.
- Stairwells and elevators are located centrally for vertical accessibility.
- Public lounge space is placed at corridor intersections to encourage socialization.

4. Overall Spatial Impression

This level supports elderly living with efficient access, privacy in units, and centralized communal spaces to foster community life.

Level 3

1. Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Balconies

2. Quantity Estimation

- Residential units × approx. 10
- Balconies × approx. 10
- Stairwells × 2
- Elevators × 2

3. Spatial Relationship Descriptions

- Each unit includes a private balcony extending into the exterior voids.
- The circulation core connects units vertically and centrally.
- Linear corridors provide symmetrical organization.

4. Overall Spatial Impression

This level extends living functions outdoors through balconies, enhancing daylight, views, and resident well-being while maintaining efficient internal layouts.

Level 4

1. Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Shared kitchen

2. Quantity Estimation

- Residential units × approx. 10
- Shared kitchen × 1
- Stairwells × 2
- Elevators × 2

3. Spatial Relationship Descriptions

- Units are placed along corridors, and a shared kitchen is situated at one end for communal usage.
- Vertical transport is positioned centrally.
- The shared kitchen acts as a soft social node.

4. Overall Spatial Impression

The inclusion of communal cooking reinforces neighborly interaction, while maintaining a repeated and clear unit distribution.

Level 5

1. Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Activity room

2. Quantity Estimation

- Residential units × approx. 10
- Activity room × 1
- Stairwells × 2
- Elevators × 2

3. Spatial Relationship Descriptions

- The activity room anchors the floor's central area, surrounded by residential units.
- Movement is supported by symmetrical vertical and horizontal circulation systems.

4. Overall Spatial Impression

A multifunctional program is introduced within the residential fabric, enriching daily routines with dedicated space for group activities.

Level 6

1. Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Reading room

2. Quantity Estimation

- Residential units × approx. 10
- Reading room × 1
- Stairwells × 2
- Elevators × 2

3. Spatial Relationship Descriptions

- The reading room is spatially isolated on one side, providing a quiet retreat from residential circulation.
- The core services remain centrally positioned.

4. Overall Spatial Impression

The sixth floor introduces a contemplative environment within a residential setting, balancing privacy, calm, and accessibility.

Level 7

1. Vocabulary Extraction

- Roof garden
- Fitness area
- Rest area

- Stairwells
- Elevators

2. Quantity Estimation

- Roof garden × 1
- Fitness area × 1
- Rest area × 2
- Stairwells × 2
- Elevators × 2

3. Spatial Relationship Descriptions

- Recreational and wellness programs are spread across the rooftop, linked by open-air paths.
- Vertical cores emerge through sheltered structures at key access points.

4. Overall Spatial Impression

The rooftop level transitions the building into an open-air social and recreational zone, celebrating nature and exercise as vital components of elderly care.
