

CASE13 - Sakuragien - Aomori Elderly Nursing Home / waiwai

Level 1

1) Vocabulary Extraction

- Reception area
- Multipurpose hall
- Dining area
- Kitchen
- Restroom
- Storage room
- Courtyard
- Garden

2) Quantity Estimation

- Reception area × 1
- Multipurpose hall × 1
- Dining area × 1
- Kitchen × 1
- Restroom × 2
- Storage room × 2
- Courtyard × 1
- Garden × 1

3) Spatial Relationship Descriptions

- The reception area is positioned near the main entrance and connects directly to both the multipurpose hall and dining area.
- The kitchen is adjacent to the dining area to facilitate food service.
- Restrooms are located near the primary activity zones for convenient access.
- The courtyard and garden are centrally placed to provide a visual and physical focal point for common areas.

4) Overall Spatial Impression

- The ground floor functions as a public activity zone, prioritizing social interaction, accessibility, and a close relationship with nature.

Level 2

1) Vocabulary Extraction

- Residential units
- Corridor
- Stairwell
- Balcony
- Restroom

2) Quantity Estimation

- Residential units × approx. 10
- Corridor × 1
- Stairwell × 2
- Balcony × approx. 5
- Restroom × approx. 2

3) Spatial Relationship Descriptions

- Residential units are linearly arranged along a central corridor to allow easy navigation.
- Stairwells are positioned at both ends of the corridor for efficient vertical circulation.
- Balconies are attached to selected residential units, facing outward to engage with surrounding landscapes.
- Restrooms are spaced along the corridor for shared accessibility.

4) Overall Spatial Impression

- The second floor is dedicated to private residential use, with a clear and efficient circulation layout and enhanced spatial quality through semi-outdoor connections like balconies.
