

CASE OUTPUT: Elderly Care Skrvet Kjellander + Sjberg Architects

Number of Levels: 5 Floors (Level 1 to Level 5)

(Level count verified through section drawing provided in the case documentation.)

Level 1

Vocabulary Extraction

Entrance hall

Multipurpose activity rooms

Dining hall

Kitchen

Medical room

Storage rooms

Public toilets

Corridor

Central courtyard

Quantity Estimation

Entrance hall 1

Activity rooms approximately 2

Dining hall 1

Kitchen 1

Medical room 1

Storage rooms approximately 2

Public toilets approximately 2

Spatial Relationship Descriptions

The entrance hall is directly connected to the main circulation corridor, distributing access to all ground floor functions.

Kitchen is directly adjacent to the dining hall for efficient service.

Activity rooms are located along the corridor, offering easy access and visibility.

The medical room is located near the main entrance for convenience and emergency accessibility.

A central courtyard allows daylight penetration and connects to internal communal spaces.

Overall Spatial Impression

Level 1 prioritizes social and support functions. Spaces are arranged to promote accessibility, visual connection, and community gathering.

Level 24 (Residential Floors)

Vocabulary Extraction

Residential units (bedrooms)

Shared living rooms

Floor-based dining niches

Pantry/tea kitchen

Public toilets

Corridors

Balconies

Quantity Estimation (per floor)

Residential units approximately 10

Shared living room 1

Dining niche 1

Tea kitchen 1

Public toilets approximately 2

Balcony 1 or more

Spatial Relationship Descriptions

Units are distributed linearly along both sides of a central corridor.

Shared living and dining areas are centrally positioned to create communal cores.

Tea kitchen is located near the dining niche, enabling semi-domestic functions.

Balconies extend from select units or communal areas, providing outdoor relief.

Overall Spatial Impression

Each residential floor is designed for balanced independence and social integration, ensuring privacy within units while offering spaces for collective living.

Level 5 (Roof Level)

Vocabulary Extraction

Greenhouse

Rooftop terrace

Storage room

MEP (Mechanical/Electrical) zone

Quantity Estimation

Greenhouse 1

Rooftop terrace 1

Storage room approximately 1

MEP zone 1

Spatial Relationship Descriptions

The rooftop greenhouse and terrace are spatially connected, encouraging outdoor and gardening activities.

Storage is positioned adjacent to the greenhouse for ease of tool access.

MEP installations are located discretely at the rear section of the rooftop.

Overall Spatial Impression

The roof functions as a wellness and technical zone supporting both building operations and resident recreational use through green engagement.
