

CASE18 - Hodoš Centre for the Elderly

Level 1

① Vocabulary Extraction

- Entrance lobby
- Common areas
- Inner courtyard
- Residential units
- Corridor
- Staircase

② Quantity Estimation

- Residential units × approximately 10–12
- Common areas × 1
- Staircase × at least 1

③ Spatial Relationship Descriptions

- The entrance lobby is positioned at the front, forming a primary access point into the facility.
- Common areas are adjacent to the entrance and provide a communal interface for both residents and visitors.
- Residential units are distributed on both sides of the corridor and oriented around a central courtyard.
- The courtyard introduces natural light and air into the core of the building, enhancing the indoor environment.
- A staircase connects the first and second levels, likely situated near the center of the building footprint.

④ Overall Spatial Impression

The ground floor prioritizes communal interaction and accessibility. Living units and shared spaces are organized a

Level 2

① Vocabulary Extraction

- Residential units
- Corridor
- Framed view windows
- Staircase

② Quantity Estimation

- Residential units × approximately 10–12
- Corridor × 1
- Staircase × at least 1

③ Spatial Relationship Descriptions

- Units follow a mirrored spatial configuration of Level 1, arrayed along both sides of a corridor.
- The corridor integrates framed windows offering outward views, acting as light wells and moments of visual pause.
- The staircase connects with the lower floor and is part of the building's vertical circulation core.

④ Overall Spatial Impression

The second level reinforces the spatial logic of the first, maintaining efficient circulation and residential rhythm. Em
