

CASE19 - Architectural Floor Analysis

Level 1

Vocabulary Extraction

- Entrance Hall
- Reception Area
- Administrative Offices
- Multipurpose Room
- Dining Area
- Kitchen
- Storage Rooms
- Restrooms
- Elevator Lobby
- Stairwell
- Corridors
- Outdoor Terrace
- Garden Access

Quantity Estimation

- Entrance Hall × 1
- Reception Area × 1
- Administrative Offices × 2
- Multipurpose Room × 1
- Dining Area × 1
- Kitchen × 1
- Storage Rooms × 2
- Restrooms × 2
- Elevator Lobby × 1
- Stairwell × 1
- Corridors × multiple
- Outdoor Terrace × 1
- Garden Access × 1

CASE19 - Architectural Floor Analysis

Spatial Relationship Descriptions

Reception and administrative areas are adjacent to the main entrance hall for functional efficiency.

Multipurpose and dining spaces are centrally positioned for shared usage and accessibility.

Kitchen and storage are clustered near the dining area for operational flow.

Circulation elements (elevator/stairwell) are centrally placed, with corridors connecting all zones and extending to outdoor spaces.

Overall Spatial Impression

The ground floor is planned as a communal and service zone, ensuring accessibility and efficient movement between administrative, social, and outdoor areas.

Level 2

Vocabulary Extraction

- One-Bedroom Units
- Two-Bedroom Units
- Private Balconies
- Corridors
- Elevator Lobby
- Stairwell
- Laundry Room
- Common Lounge

Quantity Estimation

- One-Bedroom Units × 10
- Two-Bedroom Units × 4
- Private Balconies × 14
- Corridors × multiple
- Elevator Lobby × 1
- Stairwell × 1
- Laundry Room × 1
- Common Lounge × 1

CASE19 - Architectural Floor Analysis

Spatial Relationship Descriptions

Residential units are symmetrically organized along corridors with attached balconies.

A central elevator and stairwell provide vertical connectivity.

Shared facilities (laundry and lounge) are grouped for social interaction and utility.

Overall Spatial Impression

The second floor emphasizes private living supported by shared amenities, balancing autonomy with opportunities for casual social contact.

Level 3

Vocabulary Extraction

- One-Bedroom Units
- Two-Bedroom Units
- Private Balconies
- Corridors
- Elevator Lobby
- Stairwell
- Roof Garden Access
- Mechanical Room

Quantity Estimation

- One-Bedroom Units × 8
- Two-Bedroom Units × 2
- Private Balconies × 10
- Corridors × multiple
- Elevator Lobby × 1
- Stairwell × 1
- Roof Garden Access × 1
- Mechanical Room × 1

Spatial Relationship Descriptions

CASE19 - Architectural Floor Analysis

Similar unit organization to Level 2, with corridors connecting units and balconies providing private outdoor space.

Mechanical services and roof access are placed at extremities to minimize interference.

Overall Spatial Impression

The third floor mirrors the residential structure below but incorporates rooftop access, enhancing the connection to outdoor leisure while maintaining privacy and service separation.
