

CASE 2 Housing for Elderly People in Huningue

Level 1 (Ground Floor)

Vocabulary Extraction

- Entrance Hall
- Restaurant (divided into three sections)
- Computer Room
- Hobby Workshop
- Vegetable Garden
- Petanque Field
- Corridors
- Central Staircase

Quantity Estimation

- Entrance Hall 1
- Restaurant Sections 3
- Computer Room 1
- Hobby Workshop 1
- Vegetable Garden 1
- Petanque Field 1
- Corridors Multiple
- Central Staircase 1

Spatial Relationship Descriptions

- The entrance hall provides direct access to the central staircase, facilitating vertical circulation.
- The restaurant, divided into three sections, is likely designed to accommodate varying group sizes or functions.
- The computer room and hobby workshop are positioned to encourage social interaction among residents.
- Outdoor amenities, including the vegetable garden and petanque field, are accessible from the ground floor, promoting engagement with nature and recreational activities.

Overall Spatial Impression

- The ground floor is thoughtfully designed to foster community interaction and accessibility. The central staircase

enhances vertical movement, while communal spaces like the restaurant, computer room, and hobby workshop encourage resident engagement. Outdoor amenities further enrich the living experience by connecting residents with nature.

Level 2 (First Floor)

Vocabulary Extraction

- Residential Units (25 units, each 50 m)
- Central Patio
- Corridors
- Central Staircase

Quantity Estimation

- Residential Units 25
- Central Patio 1
- Corridors Multiple
- Central Staircase 1

Spatial Relationship Descriptions

- Residential units are organized around a central patio, allowing natural light to penetrate the interior spaces.
- Corridors connect the units and lead to the central staircase, ensuring ease of movement.
- The central patio serves as a communal space, enhancing social interaction among residents.

Overall Spatial Impression

- The first floor emphasizes residential living with a focus on natural light and community. The central patio acts as a light well and communal area, while the arrangement of units around it fosters a sense of community among residents.

P2 Photographs or Renders Analysis

1. Design Vocabulary Extraction

- Brick Faade
- Large Windows
- Central Staircase

- Central Patio
- Outdoor Amenities (Vegetable Garden, Petanque Field)

2. Atmospheric Description

- The use of brick and large windows creates a warm and inviting atmosphere, blending traditional materials with modern design. Natural light floods the interior spaces, enhancing the sense of openness and comfort.

3. Spatial Composition or Hierarchy

- The building's design centers around the central staircase and patio, establishing a clear spatial hierarchy that promotes movement and interaction. The arrangement of residential units around the patio fosters a sense of community.

4. Design Intent Reading

- The design aims to create a nurturing environment for elderly residents, emphasizing accessibility, natural light, and communal spaces to encourage social engagement and well-being.

5. Contextual Relationship

- Situated on the banks of the Rhine, the building's orientation and large windows capitalize on the scenic views, connecting residents with the surrounding natural landscape.

P3 Details/Construction/Diagram Analysis

- The diagrams and details provided in the source illustrate the building's structural elements and spatial organization. The transparency diagram highlights the flow of natural light through the central patio, while construction details showcase the integration of traditional brickwork with modern architectural techniques.
