

CASE: Home for the Elderly - Ravnikar Potokar Arhitekturni

Floor Count: 6 Levels (Basement + Ground Floor + 4 Residential Levels)

LEVEL B1 - Basement

1) Vocabulary Extraction

- Service area
- Public facility rooms

2) Quantity Estimation

- Service area × approximately 1
- Public facilities × approximately 1

3) Spatial Relationship Descriptions

Basement facilities are positioned to support the operational needs of upper levels, most likely grouped in isolated zones away from main circulation paths.

4) Overall Spatial Impression

The basement level is designed as an infrastructural base, focused on utility and support functions for the entire facility.

LEVEL 1 - Ground Floor

1) Vocabulary Extraction

- Public space
- Multi-functional room
- Entrance lobby

2) Quantity Estimation

- Public space × approximately 1
- Multi-functional room × approximately 1
- Entrance lobby × 1

3) Spatial Relationship Descriptions

Public zones and flexible rooms are located near the main entrance, encouraging interaction and acting as a communal hub for both residents and visitors.

4) Overall Spatial Impression

Level 1 functions as a transitional and social interface, combining accessibility with community-oriented programming.

LEVEL 2 - Residential Floor 1

1) Vocabulary Extraction

- Residential units
- Corridor
- Lounge area

2) Quantity Estimation

- Residential units × approximately 10-12
- Corridor × 1
- Lounge area × 1-2

3) Spatial Relationship Descriptions

Residential units are linearly arranged along a central corridor with distributed lounges, enhancing passive supervision and social contact.

4) Overall Spatial Impression

A straightforward, linear layout emphasizing efficiency and accessibility while maintaining pockets of communal interaction.

LEVEL 3 - Residential Floor 2

1) Vocabulary Extraction

- Residential units
- Corridor
- Lounge area

2) Quantity Estimation

- Residential units × approximately 10-12
- Corridor × 1
- Lounge area × 1-2

3) Spatial Relationship Descriptions

Spatial repetition ensures consistency and legibility for aging residents, with the corridor-lounge-unit triad supporting routine and orientation.

4) Overall Spatial Impression

A continuation of the residential logic, maintaining simplicity and human-scaled comfort.

LEVEL 4 - Residential Floor 3

1) Vocabulary Extraction

- Residential units
- Corridor

- Lounge area

2) Quantity Estimation

- Residential units × approximately 10-12
- Corridor × 1
- Lounge area × 1-2

3) Spatial Relationship Descriptions

Unit clusters reflect an organized and familiar rhythm, fostering a sense of security and routine.

4) Overall Spatial Impression

Uniform layout and structure prioritize stability, usability, and community engagement for elderly residents.

LEVEL 5 - Residential Floor 4

1) Vocabulary Extraction

- Residential units
- Corridor
- Lounge area

2) Quantity Estimation

- Residential units × approximately 10-12
- Corridor × 1
- Lounge area × 1-2

3) Spatial Relationship Descriptions

Spatial continuity supports memory and daily life navigation, with social pockets placed intermittently for interaction.

4) Overall Spatial Impression

Final residential tier reinforces the design logic of repetition, simplicity, and community presence.
