

PROJECT: Residencia Personas Mayores

LEVEL STRUCTURE: Single-story (1 Level Total)

1. Vocabulary Extraction (Architectural Components)

- Entrance hall
- Circulation corridor
- Private rooms (Living units)
- Central courtyard
- Dining room
- Common living room
- Nurse station / control point
- Bathrooms
- Skylights
- Garden patios
- Service areas (Laundry, storage)
- Porches / covered walkways
- Roof zones (Vegetated + technical)

2. Quantity Estimation

- Private rooms × approx. 16-20 (based on repetition in plan)
- Central courtyard × 1
- Dining room × 1
- Common living room × 1
- Nurse station × 1-2
- Bathrooms × approx. 4+ (mix of private/shared)
- Skylights × multiple (located across corridor & roof)
- Garden patios × 3-4
- Service areas × 2-3 (laundry, storage)
- Covered porches × 2-3
- Entrance hall × 1

3. Spatial Relationship Descriptions

- The spatial configuration is organized radially around a central courtyard, which forms the heart of

circulation and visual orientation.

- Private rooms are distributed along a looped corridor, each with access to external patios or internal gardens, allowing both privacy and natural light.
- Common and service areas are clustered near the core, improving operational efficiency and promoting shared social activities.
- The nurse station is centrally placed to monitor corridor access points efficiently.
- Skylights and vegetated roof areas support passive ventilation and enhance environmental comfort.

4. Overall Spatial Impression

- The building presents a clear, horizontal layout with a modular spatial rhythm, enabling intuitive movement and visual connection.
- It creates a domestic and therapeutic atmosphere, prioritizing dignity, accessibility, and well-being for elderly residents.
- The courtyard typology fosters both community integration and personal retreat.
