

CASE22 - Level Analysis Output

Level 1

Vocabulary Extraction

- Entrance Hall
- Reception Area
- Common Lounge
- Dining Area
- Kitchen
- Storage Room
- Restroom
- Stairwell
- Elevator

Quantity Estimation

- Entrance Hall × 1
- Reception Area × 1
- Common Lounge × 2
- Dining Area × 1
- Kitchen × 1
- Storage Room × 2
- Restroom × 2
- Stairwell × 2
- Elevator × 2

Spatial Relationship Descriptions

The entrance hall directly connects with the reception, establishing a welcoming sequence. Common lounges are positioned adjacent to circulation spaces, supporting informal social interaction. The dining area is strategically placed next to the kitchen for logistical efficiency. Vertical circulation elements (stairs/elevators) are located symmetrically at both ends of the plan.

Overall Spatial Impression

The ground floor functions as a communal hub with a clear hierarchy between public entry, social gathering, and service spaces, promoting accessibility and interaction.

Level 2

Vocabulary Extraction

- Residential Units
- Corridor
- Common Lounge
- Restroom
- Stairwell
- Elevator

Quantity Estimation

- Residential Units × approximately 10
- Corridor × 1
- Common Lounge × 1
- Restroom × 2
- Stairwell × 2
- Elevator × 2

Spatial Relationship Descriptions

Residential units are organized linearly along a central corridor. A shared lounge space breaks the corridor's monotony and encourages social activity. Stairs and elevators are placed at corridor ends for easy vertical mobility.

Overall Spatial Impression

The first residential floor prioritizes privacy while embedding small-scale social nodes within a rational and legible circulation structure.

Level 3

Vocabulary Extraction

- Residential Units
- Corridor
- Common Lounge
- Restroom
- Stairwell
- Elevator

Quantity Estimation

- Residential Units × approximately 10
- Corridor × 1
- Common Lounge × 1
- Restroom × 2
- Stairwell × 2
- Elevator × 2

Spatial Relationship Descriptions

Same layout logic as Level 2 with linear residential organization. Shared lounge space provides social focus mid-corridor. Vertical access is mirrored from lower levels to maintain consistency.

Overall Spatial Impression

Maintains continuity in spatial logic and accessibility, combining efficient unit layouts with pockets for interaction.

Level 4

Vocabulary Extraction

- Residential Units
- Corridor
- Common Lounge
- Restroom
- Stairwell
- Elevator

Quantity Estimation

- Residential Units × approximately 10
- Corridor × 1
- Common Lounge × 1
- Restroom × 2
- Stairwell × 2
- Elevator × 2

Spatial Relationship Descriptions

Residential zones follow the same corridor logic as previous floors. Lounges offer soft nodes for encounter within a private residential floor. Stairs/elevators complete the floor's accessibility grid.

Overall Spatial Impression

Reinforces a modular and repeatable residential system designed for clarity, independence, and accessibility across vertical layers.
