

CASE24 - LEVEL-BASED ANALYSIS OUTPUT

Level -1: Basement

1. Vocabulary Extraction

- Kitchen
- Laundry
- Storage rooms
- Trash room
- Staff locker room
- Staff dining room
- Service core

2. Quantity Estimation

- Kitchen × 1
- Laundry × 1
- Storage rooms × multiple
- Trash room × 1
- Staff locker room × 1
- Staff dining room × 1

3. Spatial Relationship Description

Service and operational areas are clustered and connected via a centralized service core that vertically links to upper floors, facilitating efficient movement of goods and staff.

4. Overall Spatial Impression

This level is dedicated to back-of-house functions, focusing on logistics, food preparation, and facility maintenance, ensuring separation from resident zones above.

Level 0: Ground Floor

1. Vocabulary Extraction

- Main entrance
- Day center entrance
- Courtyard
- Porch
- Corridor
- Residential units
- Service core

2. Quantity Estimation

- Entrances × 2 (Main, Day Center)
- Courtyard × 1
- Units × approximately 4

3. Spatial Relationship Description

Dual entrances (residential and day center) lead into a landscaped courtyard and a corridor system, distributing access to residential units while maintaining clear functional zoning.

4. Overall Spatial Impression

This level establishes the public interface of the building, integrating shared outdoor space and controlled circulation paths to foster accessibility and community interaction.

Level 1-3: Upper Floors (Grouped Due to Similarity)

1. Vocabulary Extraction

- Residential units
- Corridor

- Balcony
- Service core

2. Quantity Estimation (per floor)

- Units × approximately 4
- Balconies × 1 per unit

3. Spatial Relationship Description

Each floor follows a linear corridor layout with units on either side. Each unit includes a private balcony oriented toward the adjacent park, offering views and natural light.

4. Overall Spatial Impression

These levels are standardized residential floors prioritizing clarity, accessibility, and environmental quality through repetition, symmetry, and passive design strategies.
