

CASE25 - Elderly Residential Home

Level 0

1) Vocabulary Extraction

- Entrance areas
- Public space
- Cr che
- Cr che garden

2) Quantity Estimation

- Entrance areas 1
- Public space 1
- Cr che 1 (64 children capacity)
- Cr che garden 1

3) Spatial Relationship Descriptions

- The ground level includes the main entrance and public zones adjacent to the cr che.
- The cr che is oriented toward its dedicated garden for daylight and openness.

4) Overall Spatial Impression

This level serves as an inviting interface with open, transparent spaces supporting both public access and childcare functions.

Level 1

1) Vocabulary Extraction

- Residential units
- Internal planted courtyards
- Covered terraces

2) Quantity Estimation

- Residential units approx. 12-14 beds per unit
- Internal courtyards 2
- Covered terraces 1

CASE25 - Elderly Residential Home

3) Spatial Relationship Descriptions

- Residential units are distributed around two planted courtyards creating a ring-like layout.
- Each unit incorporates a kitchen, dining, and living space that opens onto a covered terrace.

4) Overall Spatial Impression

A community-focused layout organized around courtyards encourages daylight, cross-ventilation, and resident interaction.

Level 2

1) Vocabulary Extraction

- Residential units
- Internal planted courtyards
- Covered terraces

2) Quantity Estimation

- Residential units approx. 12-14 beds per unit
- Internal courtyards 2
- Covered terraces 1

3) Spatial Relationship Descriptions

- Similar spatial logic as Level 1 with units placed around planted courts.
- Terraces serve as transition zones connecting indoor living with outdoor exposure.

4) Overall Spatial Impression

Consistent with Level 1, this level reinforces a residential cluster format enhancing both privacy and social openness.

Level 3

1) Vocabulary Extraction

- Communal areas
- Large glazed spaces

CASE25 - Elderly Residential Home

- Internal gardens

2) Quantity Estimation

- Communal areas 1
- Large glazed space 1
- Internal gardens 2

3) Spatial Relationship Descriptions

- Positioned as a functional delimiter, communal activities are grouped and oriented toward glazed garden spaces.
- Light-filled volumes open to shared green zones.

4) Overall Spatial Impression

The third level acts as a communal spine, integrating activity and greenery through transparent, generous spatial gestures.

Level 4

1) Vocabulary Extraction

- Residential units
- Terraces

2) Quantity Estimation

- Residential units approx. 12-14 beds per unit
- Terraces 1

3) Spatial Relationship Descriptions

- With reduced built footprint, larger terraces emerge, encircled by residential units.
- Outdoor areas directly connect with private living quarters.

4) Overall Spatial Impression

This level extends indoor-outdoor life by maximizing terrace availability and reinforcing spatial openness.

CASE25 - Elderly Residential Home

Level 5

1) Vocabulary Extraction

- Residential units
- Terraces

2) Quantity Estimation

- Residential units approx. 12-14 beds per unit
- Terraces 1

3) Spatial Relationship Descriptions

- Terrace-based layout continues, with housing units wrapping around semi-open outdoor space.
- Prioritizes sunlight access and social engagement.

4) Overall Spatial Impression

Top-floor organization prioritizes exposure and communal atmosphere while maintaining individual residential integrity.
