

CASE3 - Elderly House in Rikuzentakata City

LEVEL DEFINITION

Total Floors: 1

Building Name: Elderly House in Rikuzentakata City "Hokkori-ya"

Level 1

1. Vocabulary Extraction

- Corridor (south side corridor)
- Living rooms (north side)
- Residential units
- Courtyard
- Entrance
- Shared space
- Storage rooms
- Kitchen
- Bathrooms
- Toilets

2. Quantity Estimation

- Corridor × 1
- Living rooms × approximately 5
- Residential units × approximately 10
- Courtyard × 1
- Entrance × 1
- Shared space × approximately 2
- Storage rooms × approximately 2
- Kitchen × 1

- Bathrooms × approximately 2

- Toilets × approximately 2

3. Spatial Relationship Descriptions

- The building is organized in a linear fashion with a continuous corridor on the south side and residential units and living spaces on the north.

- A central courtyard introduces daylight and ventilation and serves as a communal node.

- Shared spaces and kitchen are placed near the entrance for accessibility.

- Bathrooms, toilets, and storage rooms are placed at both ends for balanced access.

4. Overall Spatial Impression

The ground floor is designed for comfortable senior living with a strong emphasis on natural light, social interaction, and accessibility, anchored by a centrally located courtyard and a unifying corridor.

P2 - Photographic and Rendered Imagery Analysis

1. Design Vocabulary Extraction

- Wooden facade
- Large glass openings
- Sloped roof
- Open-air courtyard
- South-side corridor
- Daylight integration

2. Atmospheric Description

The ambiance is warm and homely, achieved through the use of wooden textures and abundant natural light. The spatial proportions are modest and welcoming, reflecting a domestic scale suitable for elderly residents.

3. Spatial Composition or Hierarchy

The layout features linear circulation with spatial nodes (like the courtyard) forming a layered experience. The courtyard functions as a central anchor point both visually and socially.

4. Design Intent Reading

The design intends to promote interaction, daylight access, and a connection to nature. It reflects a human-centered approach tailored for senior users, balancing privacy and collectivity.

5. Contextual Relationship

The building respects the natural sloped terrain and is designed to reintegrate into the existing landscape. Courtyards and vegetation help re-establish the site's original ecological identity.
