

LEVEL STRUCTURE OVERVIEW (Total: 5 Levels)

Level 1

1. Vocabulary Extraction

- Entrance Hall
- Dance Hall
- Dining Hall
- Kitchen
- Storage Room
- Restroom
- Equipment Room
- Multi-purpose Activity Area
- Medical Room

2. Quantity Estimation

- Entrance Hall x approx. 1
- Dance Hall x approx. 1
- Dining Hall x approx. 1
- Kitchen x approx. 1
- Storage Room x 2-3
- Restroom x 2-3
- Equipment Room x 1-2
- Multi-purpose Activity Area x 1
- Medical Room x 1

3. Spatial Relationship Descriptions

- The entrance hall connects to the central public zones.
- Kitchen is adjacent to the dining hall for food service efficiency.
- Activity areas such as the dance hall and multipurpose space are grouped together for flexibility.
- Storage and equipment rooms are positioned near service zones.
- The medical room is located close to the entrance for quick access.

4. Overall Spatial Impression

The ground floor functions as a public and service core, integrating wellness, culinary, and recreation facilities arranged to promote circulation and operational support.

Level 2

1. Vocabulary Extraction

- Elderly Bedrooms
- Lounge Area
- Reading Area
- Chess & Card Room
- Restroom
- Service Desk

2. Quantity Estimation

- Elderly Bedrooms x approx. 10-12
- Lounge Area x 1-2
- Reading Area x 1
- Chess & Card Room x 1
- Restroom x 2-3
- Service Desk x 1

3. Spatial Relationship Descriptions

- Bedrooms encircle a central void or atrium, maximizing light and air circulation.
- Lounge, reading, and chess rooms are grouped as shared leisure facilities.
- The service desk is centrally located for accessibility and care management.

4. Overall Spatial Impression

The second floor emphasizes residential comfort with integrated communal areas, fostering interaction while maintaining spatial clarity.

Level 3

1. Vocabulary Extraction

- Elderly Bedrooms
- Atrium
- Lounge Area
- Restroom
- Service Desk

2. Quantity Estimation

- Elderly Bedrooms x approx. 10-12
- Atrium x 1
- Lounge Area x 1-2
- Restroom x 2-3
- Service Desk x 1

3. Spatial Relationship Descriptions

- Bedrooms are organized around a central atrium to ensure daylight access.
- Lounge areas support semi-public interaction near room clusters.

- The service desk provides an operational anchor for the floor.

4. Overall Spatial Impression

This level mirrors the lower floor's logic, reinforcing the balance between private rest and shared community engagement via natural light and open space.

Level 4

1. Vocabulary Extraction

- Elderly Bedrooms
- Atrium
- Lounge Area
- Restroom
- Service Desk

2. Quantity Estimation

- Elderly Bedrooms x approx. 10-12
- Atrium x 1
- Lounge Area x 1-2
- Restroom x 2-3
- Service Desk x 1

3. Spatial Relationship Descriptions

- Similar configuration to previous floors: atrium-centered planning with peripherally arranged bedrooms.
- Rest and lounge zones facilitate visual connectivity and social interaction.
- Service stations are embedded in circulation nodes.

4. Overall Spatial Impression

The fourth floor maintains a consistent spatial typology of wellness-oriented living, strengthened by circulation clarity and communal ambiance.

Level 5

1. Vocabulary Extraction

- Atrium
- Multi-purpose Activity Area
- Lounge Area
- Restroom
- Service Desk

2. Quantity Estimation

- Atrium x 1
- Multi-purpose Activity Area x approx. 1
- Lounge Area x 1-2
- Restroom x 2-3
- Service Desk x 1

3. Spatial Relationship Descriptions

- Central atrium extends vertically, acting as a light and spatial anchor.
- Activity zones are adjacent to rest areas to encourage flexibility and comfort.
- Circulation is organized around the core to provide accessibility and openness.

4. Overall Spatial Impression

The top floor concludes the vertical program with active and semi-public functions, supporting cognitive and physical stimulation in a naturally lit, socially inclusive layout.
