

STEP 1

P1 Architectural Drawings

Level B1 (Basement)

Vocabulary Extraction

- Service rooms
- Staff facilities
- Courtyard (for ventilation/light)

Quantity Estimation

- Service rooms multiple
- Courtyards 2 (shared with upper levels for light and ventilation)

Spatial Relationship Descriptions

- Basement areas are linked to courtyards for natural ventilation and lighting.
- Staff and service facilities are grouped in the underground level for operational separation.

Overall Spatial Impression

The basement houses back-of-house programs organized for efficiency and enhanced environmental quality via open courtyards above.

Level 1 (Ground Floor)

Vocabulary Extraction

- Residential units
- Courtyards
- Common areas
- Administrative offices

Quantity Estimation

- Residential units approx. 4 (arranged on either side)
- Courtyards 2
- Common area spaces multiple (lounge/dining/interaction)
- Offices at least 1 administrative core

Spatial Relationship Descriptions

- Residential modules flank two large courtyards.
- Public and semi-public zones like administration and lounges are concentrated near the entry axis.
- Courtyards mediate circulation, light, and spatial separation.

Overall Spatial Impression

The ground floor creates a clear spatial logic with residential zones facing inward toward light-filled courtyards, while administrative and communal functions are consolidated for accessibility.

Level 2 (First Floor)

Vocabulary Extraction

- Residential units
- Courtyards

Quantity Estimation

- Residential units approx. 1 (centralized on upper floor)
- Courtyards 2 (extending vertically from Level 1)

Spatial Relationship Descriptions

- Upper-level residential units are situated between two courtyards.

- The layout ensures continuous access to light and ventilation via vertical openings.

Overall Spatial Impression

The second floor is quieter and more private, with minimal program and a spatial emphasis on openness and natural comfort.
