

CASE36 - Architectural Spatial Analysis

Level 1

1. Vocabulary Extraction

- Entrance hall
- Nursery
- Restaurant
- Kitchen
- Multipurpose activity room
- Garden
- Stairwell
- Elevator

2. Quantity Estimation

- Entrance hall × 1
- Nursery × 1
- Restaurant × 1
- Kitchen × 1
- Multipurpose activity room × 1
- Garden × 1
- Stairwell × approximately 2
- Elevator × approximately 2

3. Spatial Relationship Descriptions

- The entrance hall connects directly to both the nursery and the restaurant, facilitating accessibility.
- The kitchen is directly adjacent to the restaurant, enabling efficient service operations.
- The multipurpose room opens toward the garden, allowing for indoor-outdoor activity continuity.
- Stairwells and elevators are positioned on opposite ends for optimal vertical circulation.

4. Overall Spatial Impression

Level 1 integrates essential public programs in a socially inclusive arrangement, balancing community interaction and service efficiency with access to outdoor green space.

Level 2

1. Vocabulary Extraction

- Senior living units
- Shared lounge
- Stairwell
- Elevator

2. Quantity Estimation

- Senior living units × approximately 10-12
- Shared lounge × 1

- Stairwell × approximately 2
- Elevator × approximately 2

3. Spatial Relationship Descriptions

- Residential units are symmetrically distributed along central corridors.
- A shared lounge is located centrally to encourage resident interaction.
- Stairwells and elevators are located at both ends, ensuring clear and accessible vertical movement.

4. Overall Spatial Impression

Level 2 focuses on organized residential layouts enhanced by a communal lounge, creating a balanced living environment of privacy and shared community experience.

Level 3

1. Vocabulary Extraction

- Senior living units
- Shared lounge
- Stairwell
- Elevator

2. Quantity Estimation

- Senior living units × approximately 10-12
- Shared lounge × 1
- Stairwell × approximately 2
- Elevator × approximately 2

3. Spatial Relationship Descriptions

- Layout mirrors Level 2, with living units flanking the main circulation spine.
- A centrally positioned lounge facilitates semi-public interactions.
- Circulation cores are retained at consistent vertical axes.

4. Overall Spatial Impression

Level 3 maintains the residential rhythm and typology of the floor below, reinforcing continuity in spatial logic and community accessibility.

Level 4

1. Vocabulary Extraction

- Senior living units
- Shared lounge
- Stairwell
- Elevator

2. Quantity Estimation

- Senior living units × approximately 10-12
- Shared lounge × 1
- Stairwell × approximately 2
- Elevator × approximately 2

3. Spatial Relationship Descriptions

- Living units are arranged similarly to previous floors.
- Central lounge remains a consistent social anchor.
- Stairwells and elevators maintain vertical connectivity throughout all floors.

4. Overall Spatial Impression

Level 4 continues the modular, residential system, reinforcing clarity and user familiarity across floors through repeated spatial patterns.

Level 5

1. Vocabulary Extraction

- Technical service area
- Rooftop garden
- Stairwell
- Elevator

2. Quantity Estimation

- Technical service area × 1
- Rooftop garden × 1
- Stairwell × approximately 2
- Elevator × approximately 2

3. Spatial Relationship Descriptions

- Mechanical/technical areas are discretely placed away from public zones.
- Rooftop garden offers panoramic views and accessible outdoor leisure.
- Stairwells and elevators provide direct access to rooftop areas for all users.

4. Overall Spatial Impression

Level 5 is a hybrid floor combining infrastructural needs with leisure space, merging functionality and well-being atop the building.
