

CASE37 - The Gardens Care Home / Marge Arkitekter

Number of Levels: 2

Level 1

1. Vocabulary Extraction

- Courtyard
- Corridor
- Residential Unit
- Common Facilities
- Visitor Center

2. Quantity Estimation

- Courtyards × approximately 2
- Corridors × multiple, connecting units and shared spaces
- Residential Units × approximately 20
- Common Facilities × approximately 3 (including dining and resting areas)
- Visitor Center × 1

3. Spatial Relationship Descriptions

- Residential units are arranged around central courtyards, forming a communal inward-facing layout.
- Corridors create direct connections between living spaces and shared programs.
- The visitor center is located near the entrance, providing direct access for guests and services.

4. Overall Spatial Impression

The ground floor is organized around shared courtyards, promoting interaction among residents and

supporting a warm and cohesive living environment.

Level 2

1. Vocabulary Extraction

- Roof Terrace
- Residential Unit
- Common Facilities
- Corridor

2. Quantity Estimation

- Roof Terraces × approximately 2
- Residential Units × approximately 20
- Common Facilities × approximately 2
- Corridors × multiple, serving the upper floor layout

3. Spatial Relationship Descriptions

- Roof terraces are spatially integrated with residential units and common spaces to offer outdoor access and scenic views.
- Corridors establish clear circulation paths throughout the floor.

4. Overall Spatial Impression

The second floor uses elevated terraces as extended social spaces, blending indoor comfort with outdoor openness and encouraging community interaction.
