

Level-Based Spatial Data (Total: 6 Levels)

Level B1 - Basement

1. Vocabulary Extraction

- Parking area
- Technical rooms
- Storage rooms

2. Quantity Estimation

- Parking spaces x approximately 44
- Technical/storage rooms x several (exact number unclear)

3. Spatial Relationship Descriptions

- The parking occupies the majority of the basement footprint, while technical and storage rooms are positioned peripherally to ensure accessibility and utility maintenance.

4. Overall Spatial Impression

A function-driven layout with a focus on service and support facilities, emphasizing efficient vehicular and technical access.

Level 0 - Ground Floor

1. Vocabulary Extraction

- Main entrance
- Reception area
- Waiting area
- Consultation rooms
- Administrative offices

2. Quantity Estimation

- Reception area x 1

- Waiting area x 1
- Consultation rooms x approximately 4-6
- Administrative offices x several (unspecified)

3. Spatial Relationship Descriptions

- The entrance leads to a centralized reception, which is adjacent to a main waiting area; consultation rooms are distributed around it, and office zones are more secluded for staff workflow.

4. Overall Spatial Impression

Efficient and accessible patient-centric configuration, prioritizing flow and separation of public versus staff zones.

Level M - Mezzanine

1. Vocabulary Extraction

- Connecting ramp
- Corridor
- Rest area

2. Quantity Estimation

- Connecting ramp x 1
- Corridor x 1
- Rest area x 1+ (assumed based on visual indicators)

3. Spatial Relationship Descriptions

- Positioned as a transition layer, the mezzanine connects the street to the inner building with ramped circulation and open walkways overlooking the entrance areas.

4. Overall Spatial Impression

Designed to bridge public and private functions, offering visual openness and access continuity.

Level 1

1. Vocabulary Extraction

- Residential units
- Shared kitchen
- Shared living room
- Laundry room

2. Quantity Estimation

- Residential units x approximately 8
- Shared kitchen x 1
- Shared living room x 1
- Laundry room x 1

3. Spatial Relationship Descriptions

- Residential units are symmetrically distributed along corridors with shared amenities located centrally to foster social engagement.

4. Overall Spatial Impression

Community-based spatial strategy encouraging interaction among residents through centralized shared functions.

Level 2

1. Vocabulary Extraction

- Residential units
- Shared kitchen
- Shared living room
- Laundry room

2. Quantity Estimation

- Residential units x approximately 8
- Shared kitchen x 1

- Shared living room x 1

- Laundry room x 1

3. Spatial Relationship Descriptions

- Repetition of the first-floor scheme with identical spatial layout, emphasizing modular and equitable distribution of living space.

4. Overall Spatial Impression

Continuity in communal housing format with consistent access to amenities.

Level 3

1. Vocabulary Extraction

- Residential units

- Shared kitchen

- Shared living room

- Laundry room

2. Quantity Estimation

- Residential units x approximately 8

- Shared kitchen x 1

- Shared living room x 1

- Laundry room x 1

3. Spatial Relationship Descriptions

- Identical to lower levels, the layout supports stacked organization and vertical circulation efficiency.

4. Overall Spatial Impression

Maintains the social and functional rhythm of the residential core across upper levels.

Level 4

1. Vocabulary Extraction

- Residential units
- Shared kitchen
- Shared living room
- Outdoor terrace

2. Quantity Estimation

- Residential units x approximately 8
- Shared kitchen x 1
- Shared living room x 1
- Terrace x 1

3. Spatial Relationship Descriptions

- Similar to other residential floors but includes a terrace offering visual and environmental connection to the exterior.

4. Overall Spatial Impression

Adds spatial diversity to residential floors with integrated outdoor exposure, enhancing livability.
