

LEVEL DETERMINATION

Based on textual descriptions and spatial layout (including reference to rooftop terraces and direct access to gardens from wards), the building comprises 4 levels.

Level 1

1 Vocabulary Extraction

- Reception hall
- Cafeteria
- Cafe
- Laundry room
- Hairdresser
- Foot therapist
- Fitness centre
- Sensory garden
- Medical clinic
- Dental clinic
- Health clinic
- Therapy rooms
- Outdoor terraces
- Atrium

2 Quantity Estimation

- Clinics (medical/dental/health) approximately 3
- Therapy rooms approximately 2-3
- Cafe and cafeteria 1 each

- Sensory gardens at least 1
- Fitness centre 1
- Reception area 1
- Laundry 1
- Hairdresser / Foot therapist 1 each

3 Spatial Relationship Descriptions

Public programs such as reception, dining, therapy, and wellness services are organized adjacent to the central atrium and accessible directly from the main entrance. Outdoor terraces and gardens are integrated with internal programs to allow seamless indoor-outdoor transition.

4 Overall Spatial Impression

The ground floor is programmed with shared, semi-public healthcare and wellness services connected through a central atrium and open edges that engage with landscape elements.

Level 2

1 Vocabulary Extraction

- Residential wards
- Common lounges
- Shared balconies
- Vertical circulation (stairs/elevators)
- Atrium edge spaces

2 Quantity Estimation

- Wards approximately 2 wings on this level
- Lounges 2-3 shared per wing
- Balconies 1 per ward wing

- Stairs/Elevators approximately 2-3 per floor

3 Spatial Relationship Descriptions

Residential wings extend from the atrium with shared lounges located near junctions. Vertical circulation cores are placed at strategic intersections, enabling movement between floors and reinforcing clustering of ward units.

4 Overall Spatial Impression

This level is designed for semi-private use, providing patient living environments arranged to maintain proximity to daylight, views, and shared community spaces.

Level 3

1 Vocabulary Extraction

- Residential wards
- Rooftop terraces
- Common living/dining spaces
- Garden-facing corridors

2 Quantity Estimation

- Wards 2-3 per wing
- Rooftop terraces 1-2
- Living/dining shared spaces approximately 2

3 Spatial Relationship Descriptions

Wards are aligned along long corridors, which open toward gardens and terraces. Social spaces are clustered near outdoor access points, enhancing interaction and therapeutic exposure to landscape.

4 Overall Spatial Impression

A residential care-focused floor designed for restorative living with direct outdoor access and therapeutic garden integration, balancing privacy with communal experience.

Level 4

1 Vocabulary Extraction

- Rooftop garden
- Service/technical areas
- Observation lounge

2 Quantity Estimation

- Rooftop garden 1 large terrace
- Technical service rooms 1-2
- Observation lounge 1

3 Spatial Relationship Descriptions

The rooftop level is partially occupied, combining technical support zones with publicly accessible garden spaces. These overlook lower courtyards and connect with the therapeutic concept of layered green zones.

4 Overall Spatial Impression

A partially enclosed rooftop level functioning as an open therapeutic terrace, complemented by limited technical facilities, offering elevated spatial and emotional relief zones.
