

CASE42 – Vivat Apartments for the Elderly

Level 1

Vocabulary Extraction:

- Medical care facilities
- Doctor's office
- Dental clinic
- Restaurant
- Chapel
- Central atrium
- Ramp
- Cantilevered bridges
- Residential units (Studio apartments)

Quantity Estimation:

- Medical care facilities × 1 (including 30 beds)
- Doctor's office × 1
- Dental clinic × 1
- Restaurant × 1
- Chapel × 1
- Residential units × multiple, located in housing wings
- Cantilevered bridges × multiple
- Ramp × 1

Spatial Relationship Descriptions:

Medical programs are consolidated into one medical wing. The restaurant and chapel are likely positioned near the center.

Overall Spatial Impression:

The first level integrates medical, religious, and dining functions around a bright central atrium, fostering community engagement.

Level 2

Vocabulary Extraction:

- Residential units (Studio apartments)
- Cantilevered bridges
- Central atrium
- Ramp
- Inclined windows

Quantity Estimation:

- Residential units × multiple, organized within each housing wing
- Cantilevered bridges × multiple, spanning across the atrium
- Ramp × 1

Spatial Relationship Descriptions:

Units cluster along the housing wings, oriented toward the atrium. Bridges enhance horizontal connectivity while maintaining verticality.

Overall Spatial Impression:

Level 2 comprises primarily residential spaces organized to enhance openness and connectivity through shared circulation.

Level 3

Vocabulary Extraction:

- Residential units (Studio apartments)
- Cantilevered bridges
- Central atrium
- Ramp
- Inclined windows

Quantity Estimation:

- Residential units × multiple
- Cantilevered bridges × multiple
- Ramp × 1

Spatial Relationship Descriptions:

Like Level 2, units are arranged in linear blocks along atrium edges. Visual and physical connections are reinforced by bridges.

Overall Spatial Impression:

The third level replicates the second in spatial configuration, promoting continuity in residential layout and maintaining high-quality living environments.
