

CASE43 - Architectural Spatial Analysis

LEVEL 1

1. Vocabulary Extraction

- Room units
- Central courtyard
- Corridors
- Small plazas
- Activity room
- Fitness room
- Medical consultation room
- Main hall

2. Quantity Estimation

- Room units: approximately 20-30
- Central courtyard: 1
- Corridors: multiple, connecting units and shared spaces
- Small plazas: multiple
- Activity room: 1
- Fitness room: 1
- Medical consultation room: 1
- Main hall: 1

3. Spatial Relationship Descriptions

- The room units are clustered organically around a central courtyard, evoking a small village typology.

- Corridors link all programmatic elements and widen at intervals to form small plazas that encourage interaction.
- Shared public spaces (activity room, fitness room, medical room, and main hall) are adjacent to living units for ease of access.
- The central courtyard acts as a luminous core and communal outdoor space, directly accessible from most zones.

4. Overall Spatial Impression

The entire layout is organized as a single-level, village-like complex with housing cells grouped around a central courtyard.

This spatial strategy fosters community interaction while ensuring direct access to nature and shared amenities from all private units.
