

CASE44 - Morangis Retirement Home Analysis

LEVEL 1

1. Vocabulary Extraction

- Main entrance
- Central node
- Restaurant
- Salon
- Garden
- Corridor
- Unit
- Loggia

2. Quantity Estimation

- Units × approximately 2 (13 rooms per unit)
- Corridors × approximately 2
- Restaurant × 1
- Salon × approximately 2

3. Spatial Relationship Descriptions

- The main entrance leads into a central node that connects to all public and private zones.
- Living and activity areas are organized around a private garden to ensure both accessibility and visual comfort.
- Each unit is associated with a collective activity space and a small-scale area oriented toward a loggia.

4. Overall Spatial Impression

The ground floor acts as a public and social core, with strong connections to green space and an emphasis on communal gathering and accessibility.

LEVEL 2

1. Vocabulary Extraction

- Central node
- Corridor
- Unit
- Salon
- Loggia

2. Quantity Estimation

- Units × approximately 2
- Corridors × approximately 2
- Salons × approximately 2

3. Spatial Relationship Descriptions

- The central node serves as a spatial junction, connecting residential units and shared lounges.
- Corridors provide both circulation and places for rest, with framed views outward.
- Small social nodes are distributed across the units and often lead to loggias.

4. Overall Spatial Impression

The first upper floor maintains a rhythm of residential clustering and shared lounges, integrating movement with rest and views.

LEVEL 3

1. Vocabulary Extraction

- Central node
- Corridor
- Unit
- Salon
- Loggia

2. Quantity Estimation

- Units × approximately 2
- Corridors × approximately 2
- Salons × approximately 2

3. Spatial Relationship Descriptions

- Units are symmetrically positioned along corridors that branch from the central node.
- Each floor retains social pockets linked to outdoor spaces via loggias.
- Shared zones remain adjacent to private units, ensuring accessibility.

4. Overall Spatial Impression

The second upper floor continues the layered spatial logic, balancing social accessibility with residential privacy.

LEVEL 4

1. Vocabulary Extraction

- Central node
- Corridor
- Unit
- Suspended garden
- Terrace

2. Quantity Estimation

- Units × approximately 2
- Corridors × approximately 2
- Terraces × approximately 2
- Suspended gardens × 1-2

3. Spatial Relationship Descriptions

- Suspended gardens and terraces serve as elevated communal spaces, branching from unit-adjacent corridors.
- The uppermost level emphasizes openness and access to nature through outdoor extensions.

4. Overall Spatial Impression

The top floor emphasizes visual openness and therapeutic contact with nature through elevated terraces and gardens, reinforcing the design's humanistic care philosophy.
