

CASE SUMMARY: Antoine de Saint-Exupéry Residence for Dependent Elderly People

Architects: Naud & Poux

Location: Lyon, France

Levels: 4

LEVEL 1

1. Vocabulary Extraction

- Entrance lobby
- Reception area
- Communal lounge
- Dining hall
- Kitchen
- Staff rooms
- Storage rooms
- Elevator lobby

2. Quantity Estimation

- Entrance lobby × 1
- Reception area × 1
- Communal lounge × 1
- Dining hall × 1
- Kitchen × 1
- Staff rooms × approx. 2
- Storage rooms × approx. 2
- Elevator lobby × 1

3. Spatial Relationship Descriptions

- The entrance and reception areas are positioned adjacently, forming a clear public arrival zone.
- Communal lounge and dining spaces are located next to each other to facilitate social interaction.
- Kitchen connects directly to the dining hall to optimize food service logistics.
- Back-of-house programs such as staff and storage rooms are clustered away from primary circulation.

4. Overall Spatial Impression

Level 1 functions as a public and service zone emphasizing hospitality, accessibility, and operational efficiency.

LEVEL 2

1. Vocabulary Extraction

- Residential units
- Corridor
- Stairwells
- Elevator lobby
- Balconies

2. Quantity Estimation

- Residential units × approx. 6
- Corridor × 1 main corridor
- Stairwells × 2
- Elevator lobby × 1
- Balconies × 6 (1 per unit)

3. Spatial Relationship Descriptions

- Units are aligned along both sides of a linear corridor.
- Vertical circulation is anchored at both ends via stairwells and centralized elevator access.

- Balconies extend outward from each unit, enhancing natural ventilation and privacy.

4. Overall Spatial Impression

This level is residential in character, with a rational and efficient spatial distribution supporting independent living and passive environmental strategies.

LEVEL 3

1. Vocabulary Extraction

- Residential units
- Corridor
- Stairwells
- Elevator lobby
- Balconies

2. Quantity Estimation

- Residential units × approx. 6
- Corridor × 1 main corridor
- Stairwells × 2
- Elevator lobby × 1
- Balconies × 6 (1 per unit)

3. Spatial Relationship Descriptions

- Identical layout to Level 2, continuing the repetitive logic of distributed units and shared circulation.
- Each unit is coupled with a private balcony.
- Common vertical cores maintain continuity through all floors.

4. Overall Spatial Impression

A duplicated housing layout provides continuity and organizational clarity across residential floors.

LEVEL 4

1. Vocabulary Extraction

- Residential units
- Corridor
- Stairwells
- Elevator lobby
- Balconies
- Roof terraces (select units)

2. Quantity Estimation

- Residential units × approx. 4-6
- Corridor × 1 main corridor
- Stairwells × 2
- Elevator lobby × 1
- Balconies × 4-6
- Roof terraces × 2-3

3. Spatial Relationship Descriptions

- Similar corridor-based configuration, but with slightly reduced unit density.
- Some upper units have access to individual roof terraces, enabling semi-private outdoor experiences.
- Continuity of circulation and balcony design is preserved.

4. Overall Spatial Impression

The top level introduces elevated outdoor amenities, offering an enhanced spatial quality and variation while preserving the repetitive modular logic below.
