

CASE46 - Retirement Home / Meier + Associés Architectes

IMG_PREPROCESS OUTPUT FORMAT (ENGLISH)

Total Levels: 3

Level 1

1. Vocabulary Extraction

- Entrance hall
- Atrium
- Day room
- External courtyards
- Corridors
- Service areas

2. Quantity Estimation

- Day room × 1
- External courtyards × 2
- Corridors × 2
- Entrance hall × 1
- Service areas × 2

3. Spatial Relationship Descriptions

- The entrance hall and day room are arranged around a central atrium, forming the main communal core of the building.
- Corridors extend from the atrium to connect the two residential wings.
- External courtyards are located on the north and south sides, opening up the site to green outdoor spaces and linking visually with indoor lounges.
- Service zones are placed adjacent to circulation paths for operational efficiency.

4. Overall Spatial Impression

The ground floor is designed as a public and connective zone, emphasizing visual and physical permeability through courtyards and an open central atrium. Social interaction is encouraged through accessible common spaces and integration with the outdoors.

Level 2

1. Vocabulary Extraction

- Bedrooms
- Central bathroom cores
- Atrium
- Day room
- Corridors

2. Quantity Estimation

- Bedrooms × approximately 20
- Central bathroom cores × 2
- Day room × 1
- Corridors × 2

3. Spatial Relationship Descriptions

- Bedrooms are distributed along two wings, each flanking a bathroom core, maximizing room size and natural views.
- A day room sits adjacent to the atrium, forming the social heart of this floor.
- Corridors provide circulation across both wings and connect all rooms to the central communal area.

4. Overall Spatial Impression

Level 2 emphasizes residential privacy while maintaining access to communal spaces. The layout supports clear spatial zoning and enables interaction through a shared atrium lounge.

Level 3

1. Vocabulary Extraction

- Bedrooms
- Central bathroom cores
- Atrium
- Day room
- Corridors

2. Quantity Estimation

- Bedrooms × approximately 20
- Central bathroom cores × 2
- Day room × 1
- Corridors × 2

3. Spatial Relationship Descriptions

- The third floor replicates the spatial logic of the second, with bedroom wings surrounding the bathroom cores.
- The central atrium continues to provide light and visual openness, with a day room overlooking the internal void.
- Circulation routes are direct and mirror the levels below for consistency and ease of use.

4. Overall Spatial Impression

Level 3 reinforces vertical continuity and programmatic consistency, using the atrium as both a light well and a spatial anchor across all floors. It continues the balance between private and communal life established on lower levels.
