

CASE51

LEVEL 1

1. Vocabulary Extraction

- Entrance lobby
- Central living kitchen
- Single rooms
- Barrier-free bathrooms
- Storage rooms
- Vertical circulation cores (stairs/elevator)
- Common lounge areas

2. Quantity Estimation

- Single rooms × approximately 10-12
- Central kitchen × 1
- Barrier-free bathrooms × 10-12 (1 per unit)
- Vertical circulation × 4 (one per block)
- Common areas × 2-3

3. Spatial Relationship Descriptions

- The single rooms are arranged around the central living kitchen, promoting communal interaction.
- Circulation cores are placed at the junctions of each block, enabling convenient vertical flow.
- Common lounges are inserted between volumes for shared use.

4. Overall Spatial Impression

The ground level functions as a socially vibrant and accessible layer, with clustered private units

surrounding communal and service spaces.

LEVEL 2

1. Vocabulary Extraction

- Central living kitchen
- Single rooms
- Barrier-free bathrooms
- Vertical circulation cores
- Lounge/common zones

2. Quantity Estimation

- Single rooms × approximately 10-12
- Central kitchen × 1
- Barrier-free bathrooms × 10-12
- Vertical circulation × 4
- Common lounges × 2-3

3. Spatial Relationship Descriptions

- Similar to Level 1, private units are grouped around a central shared kitchen and gathering space.
- Circulation cores connect vertically and serve as spine joints.
- Common zones act as soft transitions between residential blocks.

4. Overall Spatial Impression

This floor mirrors the configuration of Level 1 to ensure consistency in orientation and accessibility, reinforcing residential cohesion.

LEVEL 3

1. Vocabulary Extraction

- Central living kitchen
- Single rooms
- Barrier-free bathrooms
- Vertical circulation cores
- Shared terrace or common room

2. Quantity Estimation

- Single rooms × approximately 10-12
- Central kitchen × 1
- Barrier-free bathrooms × 10-12
- Vertical circulation × 4
- Common/shared area × 2-3

3. Spatial Relationship Descriptions

- Identical modular distribution continues, with common spaces bridging blocks.
- Terraces or lounge zones might be introduced for extended interaction.
- Circulation ensures smooth vertical continuity across all blocks.

4. Overall Spatial Impression

An emphasis on residential repetition and social interconnection characterizes the third floor, possibly integrating exterior views or open areas.

LEVEL 4

1. Vocabulary Extraction

- Central living kitchen
- Single rooms

- Barrier-free bathrooms
- Vertical circulation
- Terrace / observation area
- Common room

2. Quantity Estimation

- Single rooms × approximately 10-12
- Central kitchen × 1
- Barrier-free bathrooms × 10-12
- Vertical circulation × 4
- Common or roof-access zones × 2-3

3. Spatial Relationship Descriptions

- Maintains unit-kitchen clusters as in lower levels.
- Likely includes rooftop access or terraces connected to common rooms.
- Circulation elements support rooftop engagement or panoramic views.

4. Overall Spatial Impression

The top level integrates functional residential layouts with enhanced openness and view-oriented design, offering more natural light and environmental connection.
