- Atrium
- Garden
- Corridor
- Vestibule

② Quantity Estimation

- Residential Units × 3
- Common Living Rooms × 3
- Nurses' Station × 1
- Café × 1
- Hairdresser × 1
- Oratory × 1
- Atrium × 1
- Garden × multiple
- Corridors × multiple
- Vestibule × 1

③ Spatial Relationship Descriptions

- Three residential units are arranged around a central “village square” to foster community interaction.

CASE OUTPUT — Residential Care Home Andritz

- Public amenities like the café, hairdresser, and oratory are centrally located for easy access.
- Each residential unit contains its own common living room and garden area, providing both privacy and communal space.

④ Overall Spatial Impression

The ground floor serves as the primary community and service zone, combining residential living with centralized social and care facilities in a clustered layout to promote interaction and accessibility.

Level 2

① Vocabulary Extraction

- Residential Units
- Common Living Room
- Nurses' Station
- Atrium
- Tower Galleries
- Corridor

② Quantity Estimation

- Residential Units × 4
- Common Living Rooms × 4
- Nurses' Station × 1
- Atrium × 1
- Tower Galleries × multiple
- Corridors × multiple

③ Spatial Relationship Descriptions

- Four residential units are distributed along four wings, all radiating from a central atrium.
- Each unit includes a common living room directly connected to the atrium and tower galleries, supporting internal circulation and views.
- The central nurses' station ensures proximity and visual control over all units.

CASE OUTPUT — Residential Care Home Andritz

④ Overall Spatial Impression

The upper floor emphasizes visual and spatial connectivity through the central atrium and gallery corridors, encouraging passive surveillance and social transparency while maintaining unit autonomy.
