- At-grade access point

Quantity Estimation

- Units: approximately 29 units
- Laundry rooms: multiple (exact number not specified)
- Raised planters: several within garden areas
- Outdoor exercise station: 1
- Bocce ball court: 1
- Community building: 1
- Central promenade: 1

CASE58 - Casa Grande Senior Apartments

- Patios / Balconies / Viewing windows: several

Spatial Relationship Descriptions

- Residential units are arranged around a central promenade, fostering micro-neighborhood interactions.
- The central promenade connects key shared facilities including the community building, garden, creek, and recreational amenities.
- Outdoor plazas and patios act as transition spaces encouraging social gatherings.
- Functional and recreational areas are strategically distributed to maximize walkability and accessibility.
- At-grade access points support barrier-free mobility, particularly important for senior residents.

Overall Spatial Impression

- The first floor prioritizes community engagement and accessibility through an open, promenade-based layout linking private units with social and recreational amenities.

Level 2

Vocabulary Extraction

- Unit
- Walkway
- Connecting bridge
- Laundry room
- Balcony
- Viewing window

Quantity Estimation

- Units: approximately 29 units
- Laundry rooms: several (location distributed across upper levels)
- Walkways and bridges: multiple, distributed for access to units
- Balconies / Viewing windows: several per unit façade

CASE58 - Casa Grande Senior Apartments

Spatial Relationship Descriptions

- Units are connected via open-air walkways and bridges that link to vertical circulation (two elevators).
- Spatial connectivity supports both circulation and visual openness.
- Balconies and viewing windows are oriented to offer scenic views and daylight access, enhancing resident comfort.

Overall Spatial Impression

- The second floor continues the spatial logic of openness and community by utilizing walkways and bridges to maintain connectivity, offering residents elevated views and accessible circulation pathways.
