

CASE59 - Senior Citizens Residence Altenmarkt

FLOOR-BASED OUTPUT STRUCTURE

LEVEL 1

1. Vocabulary Extraction

- Reception
- Foyer
- Dining Room
- Event Area
- Private Garden
- Corridor
- Stairwell

2. Quantity Estimation

- Reception × 1
- Foyer × 1
- Dining Room × 1
- Event Area × 1
- Private Garden × 1
- Stairwells × approx. 2

3. Spatial Relationship Descriptions

- The reception area is directly connected to the foyer, forming the primary entry zone.
- The foyer links the dining room and the event area, facilitating movement and social interaction.
- The private garden is located centrally and surrounded by the building mass, offering outdoor

respite.

- Corridors interconnect all major functions and provide access to vertical circulation (stairwells).

4. Overall Spatial Impression

The ground floor serves as a communal core, integrating reception, dining, and event functions around a central foyer and garden to encourage interaction among residents.

LEVELS 2-4

Due to the absence of architectural drawings or explicit descriptions for the upper floors, these levels are excluded from detailed analysis. Elevation and section drawings indicate a total of 4 stories, but programmatic clarity is only available for Level 1.

Note: Additional documentation or multi-floor plans would be required to complete LEVEL 2-4 entries reliably and professionally.
