

CASE61 - 30 Senior Housing Analysis

CASE61 - 30 Senior Housing

Project: 30 Senior Housing

Architect: Bastiaan Jongerius Architecten

Source: <https://www.archdaily.com/410233/30-senior-housing-bastiaan-jongerius-architecten>

Building Type: Mixed Residential Family & Senior Housing

Floors: Two buildings one with 2 levels, one with 3 levels

P1 Architectural Drawings Analysis

Vocabulary Extraction:

- Dwelling units
- Stairwells
- Corridors
- Balconies
- Gardens
- Entrances
- Windows
- Roofs

Quantity Estimation:

- Family dwellings 13 (approx. 95 m each, with gardens)
- Senior apartments 17 (approx. 85 m each, with balconies)
- Stairwells approx. 12 per building
- Balconies 1 per senior apartment
- Gardens 1 per family dwelling

CASE61 - 30 Senior Housing Analysis

Spatial Relationships:

- Family dwellings are clustered on the ground floor and feature private gardens at the rear.
- Senior apartments occupy stacked upper floors, each with private balconies.
- Stairwells connect vertically through buildings; corridors link horizontally between units.
- There is a clear separation and articulation between public/shared paths and private dwelling zones.

Overall Spatial Impression:

The site demonstrates a dual-residential typology, contrasting horizontal family living with vertically stacked senior units, combining privacy and shared access efficiency.

P2 Photographs / Renderings Analysis

1. Design Vocabulary:

- Red brick faade
- Large-format windows
- Private balconies
- Gabled roofs
- Private gardens
- Linear walkways
- Staircases

2. Atmospheric Description:

The design conveys warmth and domesticity through traditional red brickwork. Natural light penetrates generously via large windows. The material palette and form emphasize texture and human scale, offering comfort and familiarity.

CASE61 - 30 Senior Housing Analysis

3. Spatial Composition / Hierarchy:

Spatial organization is articulated through vertical massing and horizontal layering. Rhythmic balcony and window placements establish faade order. Ground-level units anchor the building while upper levels retract visually through lighter expressions.

4. Design Intent Interpretation:

The architectural gesture promotes integration with the local context by using traditional materials and proportions. It simultaneously achieves modern residential functionality and inclusivity for multiple user types.

5. Contextual Relationship:

The buildings harmonize with the surrounding low-rise urban fabric. Brick material and roof profiles align with neighboring structures, offering a sensitive insertion within the environment.

P3 Detail / Concept / Diagram Analysis:

No diagrams or detail drawings were provided in this dataset. This section remains pending.

LEVEL-BY-LEVEL PROGRAMMATIC ANALYSIS

Family Housing Block 2 Levels

Level 1

Vocabulary: Dwelling units, private gardens, entrances, internal circulation paths

Quantity Estimation: 13 dwelling units, 13 gardens

Spatial Relationships: Each unit features a private front entrance and a backyard garden. Units are arranged in rows with side-by-side layouts.

CASE61 - 30 Senior Housing Analysis

Spatial Impression: Horizontal family living with garden access, emphasizing comfort and autonomy.

Senior Apartment Block 3 Levels

Level 1

Vocabulary: Apartment units, central corridor, shared entrance, stairwell

Quantity Estimation: ~56 apartment units

Spatial Relationships: Units along a corridor, accessed through a main entrance with stair access.

Spatial Impression: Layout supports elderly needs, with community and accessibility.

Level 2

Vocabulary: Apartment units, balconies, stairwell, corridor

Quantity Estimation: ~6 apartment units, 6 balconies

Spatial Relationships: Units accessed via corridor, each with balcony connection.

Spatial Impression: Emphasizes light and continuity between indoor and outdoor.

Level 3

Vocabulary: Apartment units, balconies, stairwell, corridor

Quantity Estimation: ~5 apartment units, 5 balconies

Spatial Relationships: Similar to level 2 but higher visibility and light.

Spatial Impression: Maximizes privacy and environmental interaction.
