

Building Levels Overview

Total Floors: 3 Levels

Project: St. Barbara Nursing Home

Architect: Pedevilla Architects

Level 1

(1) Vocabulary Extraction

- Entrance hall
- Dining area
- Kitchen
- Multipurpose room
- Offices
- Storage rooms
- Restrooms
- Elevator
- Staircases

(2) Quantity Estimation

- Entrance hall × 1
- Dining area × 1
- Kitchen × 1
- Multipurpose room × 1
- Offices × approximately 2
- Storage rooms × approximately 2
- Restrooms × 2
- Elevator × 1
- Staircases × 2

(3) Spatial Relationship Descriptions

- The entrance hall is centrally located and connects directly to the dining area and multipurpose room, forming the core public zone.
- The kitchen is placed adjacent to the dining area for efficient service.
- Offices and storage rooms are positioned laterally to serve back-of-house and staff needs.
- Vertical circulation elements (elevator and staircases) are placed near the central spine for optimal access.

(4) Overall Spatial Impression

The ground level is programmed for public service, administration, and activity spaces, with a focus on central connectivity and operational efficiency.

Level 2

(1) Vocabulary Extraction

- Residential units
- Shared living room
- Communal kitchen
- Restrooms
- Elevator
- Staircases

(2) Quantity Estimation

- Residential units × approximately 10
- Shared living room × 1
- Communal kitchen × 1
- Restrooms × 2

- Elevator × 1
- Staircases × 2

(3) Spatial Relationship Descriptions

- Units are aligned along a central corridor, emphasizing privacy and order.
- A shared living room and communal kitchen are located centrally to encourage interaction.
- Restrooms are distributed at both ends for convenience.
- Vertical circulation is concentrated in the core.

(4) Overall Spatial Impression

This level balances private residential needs with opportunities for communal interaction through shared facilities and structured circulation.

Level 3

(1) Vocabulary Extraction

- Residential units
- Shared living room
- Communal kitchen
- Restrooms
- Elevator
- Staircases

(2) Quantity Estimation

- Residential units × approximately 10
- Shared living room × 1
- Communal kitchen × 1
- Restrooms × 2

- Elevator × 1
- Staircases × 2

(3) Spatial Relationship Descriptions

- Similar to Level 2, with residential units organized around a central corridor.
- Shared facilities are located centrally.
- Restrooms and vertical access elements follow the same mirrored layout.

(4) Overall Spatial Impression

Repeats the logic of the level below, sustaining the programmatic focus on community living supported by clearly defined spatial zoning.
