

LEVEL-BASED ARCHITECTURAL PREPROCESS OUTPUT

Level 1

1. Vocabulary Extraction

- Entrance hall
- Reception area
- Multipurpose activity rooms
- Tea room
- Hairdressing room
- General practitioner offices
- Courtyards
- Stairwells
- Accessible facilities

2. Quantity Estimation

- Multipurpose activity rooms × approximately 2
- Tea room × 1
- Hairdressing room × 1
- General practitioner offices × approximately 2
- Courtyards × 2 (one per building block)
- Stairwells × 2

3. Spatial Relationship Descriptions

- The entrance hall sits at the central intersection of two major building blocks.
- Activity rooms are adjacent to the tea room, supporting flow between active and social spaces.
- The hairdressing room and general practitioner offices form a compact service cluster.
- Each programmatic block wraps around a courtyard, ensuring daylight and ventilation.

4. Overall Spatial Impression

The first floor serves as the social and functional base of the building, with programmatic clustering around courtyards to support interaction, accessibility, and daylight use.

Level 2

1. Vocabulary Extraction

- Office spaces
- Meeting room
- Lounge areas
- Stairwells
- Courtyards (visible continuation)

2. Quantity Estimation

- Office spaces × approximately 2
- Meeting room × 1
- Lounge areas × approximately 2
- Stairwells × 2
- Courtyards × 2 (as extended spatial experience from level 1)

3. Spatial Relationship Descriptions

- Office and meeting spaces are grouped on one side, forming an efficient administrative wing.
- Lounges are placed near courtyard openings, encouraging visual and spatial connectivity.
- Stairwells connect both levels at opposite ends of the plan, ensuring clear and distributed circulation.

4. Overall Spatial Impression

The second floor focuses on operational and administrative functions with organized layouts, ensuring privacy while maintaining spatial dialogue with the central courtyards.
