

Level -2

1. Vocabulary Extraction

- Parking area
- Technical spaces

2. Quantity Estimation

- Parking area $\times$ 1
- Technical spaces $\times$ multiple

3. Spatial Relationship Descriptions

- Parking occupies the majority of the underground second level and is spatially isolated from programmatic zones.
- Technical rooms cluster along perimeter or back-of-house zones, supporting building infrastructure.

4. Overall Spatial Impression

This level is utilitarian, prioritizing service and vehicular accessibility without spatial interaction with the main programs.

Level -1

1. Vocabulary Extraction

- Medical facility
- Technical spaces
- Storage rooms

2. Quantity Estimation

- Medical facility $\times$ 1
- Technical spaces $\times$ several

- Storage rooms × several

3. Spatial Relationship Descriptions

- Medical services are located in proximity to circulation cores for easy access from upper floors.
- Technical and storage rooms are grouped in discrete zones adjacent to service routes.

4. Overall Spatial Impression

This floor functions as a logistical backbone, ensuring seamless support to public and private areas above.

Level 1

1. Vocabulary Extraction

- Urban park
- Entrance gallery
- Interactive courtyard
- Restaurant
- Corridor
- Ramp
- Medical facility

2. Quantity Estimation

- Urban park × 1
- Entrance gallery × 2
- Courtyard × 1
- Restaurant × 1
- Corridor × several
- Ramp × several
- Medical facility × 1

3. Spatial Relationship Descriptions

- Galleries and courtyard form the public transition zone leading to main functional areas.
- Corridors and ramps guide movement between zones and vertically to other levels.
- Medical and dining zones share adjacency for user convenience.

4. Overall Spatial Impression

A threshold space that blends civic openness with directed accessibility; emphasis is placed on inclusivity and fluid circulation.

Level 2

1. Vocabulary Extraction

- Accommodation units
- Activity rooms
- Inner-outer corridor
- Terrace

2. Quantity Estimation

- Accommodation units × multiple
- Activity rooms × several
- Corridors × multiple
- Terrace × several

3. Spatial Relationship Descriptions

- Living and social zones are adjacent, encouraging daily engagement.
- Terraces are semi-private, bridging indoor and outdoor spatiality.
- Circulation runs longitudinally, connecting clusters of uses.

4. Overall Spatial Impression

This floor emphasizes independence and interaction, prioritizing comfort and shared lifestyle among residents.

Level 3

1. Vocabulary Extraction

- Accommodation units
- Activity spaces
- Terrace
- Circulation corridor

2. Quantity Estimation

- Accommodation units × multiple
- Activity spaces × several
- Terraces × several
- Corridors × several

3. Spatial Relationship Descriptions

- Repeats the programmatic typology of Level 2 with mirrored adjacency of private and communal zones.
- Outdoor access via terraces continues, enhancing openness.

4. Overall Spatial Impression

The architecture maintains a rhythmic spatial order, fostering social and sensory continuity across vertical levels.

Level 4

1. Vocabulary Extraction

- Accommodation units

- Activity spaces
- Terraces
- Corridors

2. Quantity Estimation

- Accommodation units × multiple
- Activity spaces × several
- Terraces × several
- Corridors × several

3. Spatial Relationship Descriptions

- Highest level replicates underlying organizational logic, possibly with increased openness and views.
- Continuity in corridor placement enhances familiarity for residents.

4. Overall Spatial Impression

This top floor encapsulates the vertical culmination of program layers, reinforcing both autonomy and integrated social life.
