

CASE69 - Taikang Home Su Yuan Phase 1

Building: Taikang Home Su Yuan Phase 1

Total Levels: 5

Level 1

1. Extracted Elements

- Entrance Hall
- Multi-functional Activity Room
- Restaurant
- Kitchen
- Storage Room
- Public Restroom
- Elevator Hall
- Staircase

2. Quantity Estimation

- Entrance Hall × 1
- Multi-functional Activity Room × 2
- Restaurant × 1
- Kitchen × 1
- Storage Room × 2
- Public Restroom × 2
- Elevator Hall × 1
- Staircase × approximately 2

3. Spatial Relationships

The Entrance Hall is positioned at the front and directly connects to activity rooms and elevator access. The kitchen and restaurant are clustered for direct service linkage. Storage rooms are adjacent to the kitchen. Public restrooms are near active zones for ease of access.

4. Overall Spatial Strategy

Level 1 is arranged to accommodate public interaction and service, focusing on accessibility and flow. Public amenities are zoned together with attention to efficient circulation.

Level 2

1. Extracted Elements

- Residential Unit
- Living Room
- Bathroom
- Balcony
- Elevator Hall
- Staircase

2. Quantity Estimation

- Residential Unit × approx. 10
- Living Room × approx. 10
- Bathroom × approx. 10
- Balcony × approx. 10
- Elevator Hall × 1
- Staircase × approximately 2

3. Spatial Relationships

Residential units are evenly distributed around a central corridor with vertical access through the

elevator and stairs. Each unit integrates private functions (living, bathroom, balcony) to maintain autonomy.

4. Overall Spatial Strategy

Level 2 is a standard residential floor that emphasizes individual privacy while maintaining collective accessibility via centralized circulation.

Level 3

1. Extracted Elements

- Residential Unit
- Living Room
- Bathroom
- Balcony
- Elevator Hall
- Staircase

2. Quantity Estimation

- Residential Unit × approx. 10
- Living Room × approx. 10
- Bathroom × approx. 10
- Balcony × approx. 10
- Elevator Hall × 1
- Staircase × approximately 2

3. Spatial Relationships

Identical to Level 2. Units form linear configurations with lateral and vertical access consistent across levels, promoting intuitive navigation and unit repetition.

4. Overall Spatial Strategy

Level 3 continues the same typological framework as Level 2, reinforcing the design's modular efficiency.

Level 4

1. Extracted Elements

- Residential Unit
- Living Room
- Bathroom
- Balcony
- Elevator Hall
- Staircase

2. Quantity Estimation

- Residential Unit × approx. 8
- Living Room × approx. 8
- Bathroom × approx. 8
- Balcony × approx. 8
- Elevator Hall × 1
- Staircase × approximately 2

3. Spatial Relationships

Unit count decreases, potentially making room for shared amenities or increased circulation. Shared core elements remain unchanged, enhancing spatial continuity.

4. Overall Spatial Strategy

A slight reduction in residential density suggests the inclusion of auxiliary communal functions or enhanced unit sizes.

Level 5

1. Extracted Elements

- Multi-functional Hall
- Reading Room
- Fitness Room
- Outdoor Terrace
- Elevator Hall
- Staircase

2. Quantity Estimation

- Multi-functional Hall × 1
- Reading Room × 1
- Fitness Room × 1
- Outdoor Terrace × 2
- Elevator Hall × 1
- Staircase × approximately 2

3. Spatial Relationships

Programmatic elements on this level are grouped into a recreational cluster with direct connections to outdoor terraces. Vertical access elements are centrally positioned.

4. Overall Spatial Strategy

The top level functions as a community hub offering wellness and leisure programs. Outdoor terraces integrate landscape with indoor activity spaces.
