

Building Floor Count

Based on architectural descriptions and plans, the building consists of:

- Ground Floor (Level 1): Entrance, logistics areas, and parking.
- Residential Floors (Level 2 & Level 3): Modular residential units.
- Roof Level: Green roof and covered terrace.

Level-wise Analysis

=====

Level 1 - Ground Floor

1. Vocabulary Extraction

- Entrance hall
- Laundry
- Kitchen
- Warehouse
- Changing rooms
- Parking area
- Vertical cores

2. Quantity Estimation

- Entrance hall x 1
- Laundry x 1
- Kitchen x 1
- Warehouse x 1
- Changing rooms x 1
- Parking spaces x approx. 62
- Vertical cores x 3

3. Spatial Relationship Descriptions

- Service areas are consolidated in the rear zone.
- Parking is street-accessible and wraps around the perimeter.
- Vertical cores connect to upper residential levels.

4. Overall Spatial Impression

The ground floor is logistical, organizing technical services and vehicular access efficiently.

Level 2 - First Residential Floor

1. Vocabulary Extraction

- Living units
- Coliving rooms
- Kitchenettes
- Visit rooms
- Individual bedrooms
- Double bedrooms
- Corridors
- Vertical cores

2. Quantity Estimation

- Living units x 3
- Coliving rooms x 3
- Kitchenettes x 3
- Visit rooms x 3

- Individual bedrooms x approx. 6–9 per unit
- Double bedrooms x approx. 2–4 per unit
- Corridors x 3
- Vertical cores x 3

3. Spatial Relationship Descriptions

- Each module is self-contained, arranged around shared coliving rooms.
- Corridors link rooms with common areas and vertical shafts.

4. Overall Spatial Impression

Modular independence and residential comfort, promoting autonomy and social interaction.

Level 3 - Second Residential Floor

(Similar to Level 2)

1. Vocabulary Extraction

(Same as Level 2)

2. Quantity Estimation

(Same as Level 2)

3. Spatial Relationship Descriptions

- Identical layout to Level 2, vertically stacked with aligned infrastructure.

4. Overall Spatial Impression

Repeats modular strategy for operational efficiency and clarity.

Roof Level - Accessible Terrace

1. Vocabulary Extraction

- Covered terrace
- Green roof
- Walkways
- Planters

2. Quantity Estimation

- Covered terrace x 1
- Green roof x 1
- Walkways x multiple
- Planters x several

3. Spatial Relationship Descriptions

- Outdoor loop with planters and shaded areas.
- Covered terrace as semi-protected space.
- Green roof as therapeutic garden.

4. Overall Spatial Impression

Functions as a recreational, therapeutic space promoting mobility and socialization.
