

Project: Tres Puentes West Building

Location: Bronx, New York

Architect: Shakespeare, Gordon, Vlado: Architects

Total Levels: 11 stories

Building Type: Senior housing + Community healthcare integration

Level 1

Vocabulary Extraction

- Entrance lobby
- Health clinic
- Pharmacy
- Community room
- Outdoor garden

Quantity Estimation

- Entrance lobby 1
- Health clinic 1
- Pharmacy 1
- Community room 1
- Outdoor garden 1

Spatial Relationship Descriptions

- The entrance lobby is directly connected to both the health clinic and the pharmacy for accessibility.
- The community room is positioned adjacent to the outdoor garden, supporting recreational use and resident interaction.

Overall Spatial Impression

The ground level consolidates public amenities such as healthcare and social spaces, emphasizing ease of access and community engagement.

Levels 211

Vocabulary Extraction

- Residential units (studio & one-bedroom)
- Corridor
- Stairwell
- Elevator lobby
- Laundry room

Quantity Estimation (per floor)

- Residential units approximately 1012
- Corridor 1
- Stairwells 2
- Elevator lobby 1
- Laundry room 1

Spatial Relationship Descriptions

- Units are symmetrically arranged along a central corridor.
- Vertical circulation (elevators and stairs) is centrally located for even access.
- Each floor includes a laundry room near the circulation core for shared resident use.

Overall Spatial Impression

The upper floors maintain a repetitive and efficient residential layout, facilitating clear access, social clustering, and everyday functionality.

Architectural Language Summary

Design Vocabulary

- Brick faade
- Corrugated steel panels
- Large glass windows
- Copper cladding
- Integrated urban garden
- Overhang and sunshade features

Atmospheric Qualities

- The material palette blends warmth and durability; brick and copper add texture and identity.
- Light-filled interiors with soft transitions between public and private areas.

Spatial Hierarchy & Composition

- The project is arranged around internal and external community focal points (courtyard, community rooms).
- Emphasis on rhythm through repetitive modular unit planning and elevation treatment.

Design Intent

- Prioritizes aging-in-place and accessibility.
- Seeks to harmonize healthcare and housing under one architectural umbrella.

Contextual Integration

- Blends into the urban grid while asserting its identity via material expression and public programming.
