

LEVELS SUMMARY OUTPUT

Level 1

1. Vocabulary Extraction

- Household units
- Shared living and dining areas
- Central plaza
- Restaurant
- Library
- Medical center
- Hairdresser
- Grocery store
- Cultural center
- Courtyards
- Pathways
- Private gardens
- Vegetable garden
- Mini farm

2. Quantity Estimation

- Household units $\times 16$ (4 quartiers $\times 4$ units each)
- Shared living and dining areas $\times 16$ (1 per household unit)
- Central plaza $\times 1$
- Restaurant $\times 1$
- Library $\times 1$
- Medical center $\times 1$ (including 9 staff accommodations)

- Hairdresser × 1
- Grocery store × 1
- Cultural center × 1
- Courtyards × 16
- Pathways: continuous loop throughout the site
- Private gardens × 16
- Vegetable garden × 1
- Mini farm × 1

3. Spatial Relationship Descriptions

- The household units are grouped into four residential clusters, each organized around an internal courtyard to form neighborhood-scale communities.
- A central plaza acts as a spatial and social anchor, linking together the restaurant, library, medical center, hairdresser, grocery store, and cultural center.
- Pathways create a looped circulation system that connects all zones without dead ends, ensuring safe and intuitive navigation for residents.
- Each residential unit opens to a private garden and internal courtyard, enabling visual continuity and access to green spaces.
- The vegetable garden and mini farm are placed at the perimeter, allowing for therapeutic engagement without disrupting central activities.

4. Overall Spatial Impression

The village operates as a ground-level, dementia-sensitive environment that blends care, autonomy, and sociality. A looped circulation strategy, clustered neighborhood logic, and integration of therapeutic landscapes establish a community rooted in familiarity, accessibility, and dignity.
