

CASE73 - Architectural Analysis Report

Level 1

Vocabulary Extraction

- Gate ball court
- Toilets
- Video hall
- Dressing room
- Cold storage
- Storage rooms
- Cooking classrooms (including cook rooms & noodle room)
- Dining hall
- Stage control room
- Dance hall
- Equipment store
- Entrance hall
- Hall
- Saloon
- Colored pond
- Rest platform

Quantity Estimation

- Toilets × 4
- Cooking/cook rooms × 5
- Storage / Cold storage × 4
- Dining hall × 1
- Medical room × 1
- Equipment room × 2
- Entrance hall × 2
- Dance hall × 1
- Gate ball court × 1
- Colored pond × 2

CASE73 - Architectural Analysis Report

- Rest platform × 1

Spatial Relationship Descriptions

Kitchen and cook rooms are clustered in the southeast quadrant adjacent to the dining hall. Medical and equipment rooms are near the entrance for quick access. Colored ponds and rest platforms form transitional zones between hallways and major program areas. Activity and dining zones share walls with technical service rooms.

Overall Spatial Impression

The first floor serves as a multifunctional activity base with strong culinary, dining, and recreational programming arranged for adjacency and flow from entrances.

Level 2

Vocabulary Extraction

- Multifunctional classrooms
- Library
- Meeting rooms
- Offices
- Toilets

Quantity Estimation

- Multifunctional classrooms × 3
- Library × 1
- Meeting rooms × 2
- Offices × 4
- Toilets × 2

Spatial Relationship Descriptions

Classrooms and library are centrally located, forming an educational hub. Meeting rooms are adjacent to offices, facilitating administrative functions. Toilets are positioned at both ends of the floor for accessibility.

CASE73 - Architectural Analysis Report

Overall Spatial Impression

The second floor is dedicated to educational and administrative functions, with spaces organized for efficient workflow and accessibility.

Level 3

Vocabulary Extraction

- Residential units
- Rest areas
- Toilets

Quantity Estimation

- Residential units × 10
- Rest areas × 2
- Toilets × 2

Spatial Relationship Descriptions

Residential units are aligned along corridors, creating a residential zone. Rest areas are located at corridor intersections, providing communal spaces. Toilets are situated at both ends of the corridor for convenience.

Overall Spatial Impression

The third floor functions as a residential area, balancing private living spaces with communal rest areas to foster community interaction.

Level 4

Vocabulary Extraction

- Rehabilitation center
- Gym
- Yoga room

CASE73 - Architectural Analysis Report

- Toilets

Quantity Estimation

- Rehabilitation center × 1
- Gym × 1
- Yoga room × 1
- Toilets × 2

Spatial Relationship Descriptions

Rehabilitation center and gym are colocated to form a health and wellness zone. Yoga room is situated in a quieter area for focused activities. Toilets are accessible from all activity areas.

Overall Spatial Impression

The fourth floor is designed for health and wellness activities, with spaces arranged to support both active and passive rehabilitation.

Level 5

Vocabulary Extraction

- Rooftop garden
- Walking paths
- Rest platforms

Quantity Estimation

- Rooftop garden × 1
- Walking paths × 1
- Rest platforms × 2

Spatial Relationship Descriptions

CASE73 - Architectural Analysis Report

The rooftop garden encompasses the entire roof, offering green space. Walking paths meander through the garden, connecting rest platforms. Rest platforms are strategically placed for relaxation and social interaction.

Overall Spatial Impression

The fifth floor serves as an open-air recreational space, integrating nature into the living environment to promote relaxation and community engagement.
