

CASE75 - Kapelleveld Residential Care Center

PROJECT NAME

Kapelleveld Residential Care Center

Location: Ternat, Belgium

Architect: architecten de vylder vinck taillieu

P1 - Architectural Drawings - Level 1

Vocabulary Extraction

- Entrance hall
- Common living room
- Dining area
- Kitchen
- Courtyard
- Units
- Corridor
- Stairwell
- Elevator

Quantity Estimation

- Units × approx. 20
- Common living room × 1
- Dining area × 1
- Kitchen × 1
- Courtyard × 1

Spatial Relationship Descriptions

- The entrance hall anchors the central axis and distributes access to communal and residential wings.
- The common living room and dining area are adjacent, fostering social interaction.
- Units are arranged along lateral wings, connected via main corridors branching from the central spine.

Overall Spatial Impression

CASE75 - Kapelleveld Residential Care Center

The ground floor is programmed for collective activities, with open, interconnected spaces encouraging movement and socialization.

P1 - Architectural Drawings - Level 2

Vocabulary Extraction

- Units
- Corridor
- Stairwell
- Elevator
- Terrace

Quantity Estimation

- Units × approx. 21
- Corridors × approx. 6

Spatial Relationship Descriptions

- Units are organized linearly along the corridors, each having access to a private terrace.
- Stairwells and elevators are centrally located for vertical circulation and emergency access.

Overall Spatial Impression

The upper level emphasizes privacy and residence, while maintaining easy access to circulation cores and outdoor terraces.

P2 - Photographs / Renderings

Design Vocabulary Extraction

- Pitched roof
- Cantilevered eaves
- Red wooden window frames
- Green sunshades
- Glazed brick walls

CASE75 - Kapelleveld Residential Care Center

Atmospheric Description

The use of warm, natural materials and filtered daylight creates a domestic, calm ambiance. Colorful architectural details offer tactile and visual richness.

Spatial Composition or Hierarchy

The layout follows a central-linear scheme with lateral branches. Private terraces and framed openings establish spatial rhythms and visual transparency.

Design Intent Interpretation

The project aims to humanize care architecture, replacing institutional monotony with diverse spatial experiences that promote independence and dignity.

Contextual Relationship (Optional)

The building scale and roof pitch align with the village surroundings, integrating the care center into the local urban fabric.

P3 - Detail/Constructural/Diagrammatic Images

No P3 materials were provided.

Thus, no diagrammatic or constructive interpretations can be derived at this stage.
