

CASE76 - Residence Alice Guy - Architectural Analysis Report

P1 - Architectural Drawings

(1) Vocabulary Extraction

- Entrance hall
- Dining room
- Activity space
- Administrative office
- Medical clinic
- Resident rooms
- Solariums
- Winter gardens
- Communal lounges
- Care/therapy units
- Balneotherapy room
- Snoezelen space
- City-view terrace
- Vertical circulation core

(2) Quantity Estimation

- Entrance hall × 1
- Dining room × 1
- Activity space × 1
- Administrative office × 1
- Medical clinic × 1
- Resident room clusters × approx. 2-5 per floor (Levels 2-4)
- Solariums / Winter gardens × 1 per floor (Levels 2-4)
- Communal lounges × 1 per floor (Levels 2-4)
- Care/therapy zones × 1 (Level 3)
- Balneotherapy room × 1
- Snoezelen space × 1
- Special care unit × 1
- Terrace × 1

(3) Spatial Relationship Descriptions

- Ground floor zones are grouped around a central access point.
- Vertical core links all floors centrally.
- Resident rooms are clustered around social hubs.
- Care and therapy spaces are elevated for privacy.
- Rooftop functions are distinct yet connected to outdoor spaces.

(4) Overall Spatial Impression

The layout emphasizes modular communal living and spatial clustering around natural light and social nodes.

P2 - Photographs or Renders

1. Design Vocabulary Extraction

- Perforated metal facade
- Glass surfaces
- Balconies
- Roof terrace
- Winter garden
- Interior courtyard
- Vegetation integration

2. Atmospheric Description

Bright and warm environments with natural light and soft materials creating comfort and openness.

3. Spatial Composition or Hierarchy

Rhythmic facade, axis-driven interior space, and layering create depth and clarity.

4. Design Intent Reading

Emphasizes therapeutic architecture that balances openness with privacy.

5. Contextual Relationship

Engages with the urban canal-side context and opens views to the city skyline.

P3 - Details / Constructure / Diagram

1. Vocabulary Extraction

- Modular clusters
- Central vertical shaft
- Green courtyard
- Edge buffer zones
- Sensory room units
- Light shafts

2. Quantity Estimation

- Resident room modules × approx. 40-50 units total
- Core × 1
- Winter garden × 4-5
- Common lounges × 4-5
- Rooftop therapy rooms × 3

3. Spatial Relationship Descriptions

Modules cluster around shared zones and connect via a central core. Winter gardens are focal green cores.

4. Overall Spatial Impression

Care-oriented village model with therapeutic and community-centered spatial logic.

FLOOR LEVEL ANALYSIS

Level 1

(1) Vocabulary Extraction

- Entrance hall
- Dining room
- Activity space
- Administrative office
- Medical clinic

(2) Quantity Estimation

- Entrance × 1
- Dining room × 1
- Activity space × 1
- Administrative office × 1
- Medical clinic × 1

(3) Spatial Relationship Descriptions

Reception flows into communal areas; support spaces are discreetly located.

(4) Overall Spatial Impression

A social anchor offering access, nourishment, and activity in an open layout.

Level 2-4

(1) Vocabulary Extraction

- Resident rooms
- Solariums
- Winter gardens
- Communal lounges

(2) Quantity Estimation

- Room clusters × 2-5 per floor
- Solarium / winter garden × 1 per floor
- Lounge × 1 per floor

(3) Spatial Relationship Descriptions

Each floor orients around a lounge/garden, with circulation along a central shaft.

(4) Overall Spatial Impression

Layered and repetitive layout promoting dignity and social interaction.

Level 5

(1) Vocabulary Extraction

- Balneotherapy room
- Hair salon
- Snoezelen space
- Special care unit
- Roof terrace

(2) Quantity Estimation

- Balneotherapy × 1
- Hair salon × 1
- Snoezelen × 1
- Special care unit × 1
- Roof terrace × 1

(3) Spatial Relationship Descriptions

Therapy and sensory rooms cluster for functional synergy; terrace serves as an experiential extension.

(4) Overall Spatial Impression

A rooftop capstone combining sensory healing spaces and urban engagement.
