

P1 - Architectural Drawings

1. Vocabulary Extraction

- Bedroom
- Bathroom
- Kitchen
- Living Room
- Dining Room
- Corridor
- Courtyard
- Porch
- Sliding Door
- Accessible Path

2. Quantity Estimation

- Bedrooms × approximately 2
- Bathrooms × approximately 2
- Kitchen × 1
- Living Room × 1
- Dining Room × 1
- Corridor × 1
- Courtyard × 1
- Porch × 1
- Sliding Doors × multiple

- Accessible Paths × several

3. Spatial Relationship Descriptions

- The house is composed of two perpendicular volumes enclosing a central courtyard, generating a semi-enclosed outdoor space.
- Sliding doors are used to connect indoor and outdoor areas seamlessly, supporting wheelchair accessibility.
- Functional zones such as bedrooms, living, and dining areas are distributed around the courtyard, enhancing visual and spatial connectivity.

4. Overall Spatial Impression

- The spatial strategy emphasizes privacy and accessibility through a courtyard-centered organization, enabling fluid transitions between indoor and outdoor living.

P2 - Photographs / Renderings

1. Design Vocabulary Extraction

- Stone Façade
- Wooden Ceiling
- Sliding Glass Door
- Accessible Ramp
- Recessed Lighting

2. Atmospheric Description

- A warm, modern atmosphere is conveyed through the combination of textured stone and natural wood, enhanced by soft lighting and extensive glazing that invites natural light into the interiors.

3. Spatial Composition or Hierarchy

- The courtyard acts as a focal spatial anchor, around which interior volumes are organized.
- There is a clear layering from public to private zones and consistent rhythm in the material transitions and openings.

4. Design Intent Reading

- The design clearly communicates a commitment to universal accessibility and strong indoor-outdoor integration.
- Material choices and transparency strategies reflect a desire to harmonize with the natural surroundings.

5. Contextual Relationship

- The house engages the site's topography and orientation toward a nearby stream.
- The use of sliding doors and framed views allows for visual and physical immersion into the surrounding landscape.

P3 - Diagrams / Detail Drawings

- Not applicable. No detailed constructural diagrams or conceptual graphics available in the original source content.

Floor-by-Floor Breakdown

Total Levels Identified: 1 (Single-storey house)

Level 1

1. Vocabulary Extraction

- Bedroom
- Bathroom
- Kitchen
- Living Room
- Dining Room

- Corridor
- Courtyard
- Porch
- Sliding Door
- Accessible Path

2. Quantity Estimation

- Bedrooms × approximately 2
- Bathrooms × approximately 2
- Kitchen × 1
- Living Room × 1
- Dining Room × 1
- Corridor × 1
- Courtyard × 1
- Porch × 1
- Sliding Doors × multiple
- Accessible Paths × several

3. Spatial Relationship Descriptions

- Programmatic functions are distributed around a centrally located courtyard that facilitates both social interaction and natural light penetration.
- Living and dining zones are adjacent and oriented toward exterior views.
- Accessibility is woven into all circulation spaces through ramps and wide thresholds.

4. Overall Spatial Impression

- The first level demonstrates a well-composed integration of privacy, mobility, and scenic orientation, delivering a coherent single-level living experience rooted in universal design principles.
