

CASE78 - Spatial and Architectural Analysis Report

Level 1

1. Vocabulary Extraction

- Reception hall
- Multipurpose room
- Dining room
- Kitchen
- Medical room
- Gardens

2. Quantity Estimation

- Reception hall × 1
- Multipurpose room × 1
- Dining room × 1
- Kitchen × 1
- Medical room × 1
- Gardens × 2

3. Spatial Relationship Descriptions

- The reception hall is directly adjacent to the multipurpose room, enabling smooth access for community events.
- Dining and kitchen spaces are colocated for operational efficiency.
- The medical room is positioned near the entrance for immediate accessibility.
- Two gardens flank the building, offering outdoor leisure spaces and visual relief.

4. Overall Spatial Impression

The ground floor is programmed for public engagement, wellness, and community interaction, organized to support functional flow and accessibility.

Level 2

1. Vocabulary Extraction

- Residential units
- Corridor
- Courtyard
- Balconies

2. Quantity Estimation

- Residential units × approximately 4
- Corridor × 1
- Courtyard × 1
- Balconies × approximately 2

3. Spatial Relationship Descriptions

- Residential units are arranged around a shared courtyard, fostering visual connectivity and social opportunities.
- Corridors loop along the interior perimeter, linking units to vertical circulation.
- Balconies are located on the exterior façades, providing personal outdoor extensions.

4. Overall Spatial Impression

This level emphasizes private living spaces with collective spatial logic around the courtyard to balance privacy and community.

Level 3

1. Vocabulary Extraction

- Residential units
- Corridor
- Courtyard
- Balconies

2. Quantity Estimation

- Residential units × approximately 4
- Corridor × 1
- Courtyard × 1
- Balconies × approximately 2

3. Spatial Relationship Descriptions

- The spatial pattern mirrors Level 2, with units encircling the courtyard and corridors ensuring fluid circulation.
- Balconies continue to articulate outdoor accessibility for each unit.

4. Overall Spatial Impression

Level 3 replicates the logic of Level 2, offering a repetitive, stable arrangement of domestic units supported by strong circulation and daylight access.

Level 4

1. Vocabulary Extraction

- Rooftop garden
- Rest area
- Technical room

2. Quantity Estimation

- Rooftop garden × 1
- Rest areas × 2
- Technical room × 1

3. Spatial Relationship Descriptions

- The rooftop garden forms the primary open space, framed by rest zones for informal use.
- The technical room is offset from leisure spaces, ensuring maintenance access without spatial interference.

4. Overall Spatial Impression

The fourth level is conceived as an elevated landscape offering therapeutic green exposure and supplementary service functions.
