

CASE79: New Village Care Residence / DoepelStrijkers

Building Overview

Total Floors: 5

Total Care Units: 36

Design Concept: The building combines a standard gallery block with terraced houses, resulting in a south-facing terraced landscape and a large open space for the academy on the north side.

P1: Architectural Drawings Analysis

1. Vocabulary Extraction:

- Care Units
- Communal Terrace
- Corridor Zone
- Stairwell
- Elevator
- Courtyard
- Academy Area
- Entrance Hall

2. Quantity Estimation:

- Care Units: Approximately 7 to 8 per floor
- Communal Terrace: 1 per floor
- Corridor Zone: 1 per floor
- Stairwell: 1, serving all floors

- Elevator: 1, serving all floors
- Courtyard: 1 central courtyard
- Academy Area: 1, located on the north side
- Entrance Hall: 1, located on the ground floor

3. Spatial Relationship Descriptions:

- Care units are organized around a central courtyard, promoting community interaction.
- Each floor features a communal terrace adjacent to the corridor zone, facilitating social engagement.
- The stairwell and elevator are centrally located, providing vertical circulation throughout the building.
- The academy area is positioned on the north side, creating a connection between living and learning spaces.
- The entrance hall serves as a transitional space between the external environment and the interior communal areas.

4. Overall Spatial Impression:

The architectural design emphasizes community and interaction, with care units arranged around a central courtyard and communal terraces on each floor. The integration of the academy area fosters a blend of residential and educational functions.

P2: Photographs and Renderings Analysis

1. Design Vocabulary Extraction:

- Terraced Landscape
- Wooden Facade
- Large Glazed Windows
- Metal Railings
- Green Roof
- Daylighting

2. Atmospheric Description:

The building exudes a warm and inviting atmosphere, achieved through the use of natural materials like wood and the incorporation of greenery. Large glazed windows allow ample natural light, enhancing the sense of openness and connection to the outdoors.

3. Spatial Composition or Hierarchy:

The design features a terraced landscape that creates a dynamic spatial hierarchy, with each level offering communal terraces that overlook the central courtyard. This arrangement promotes a sense of community while providing individual privacy.

4. Design Intent Reading:

The architectural intent focuses on creating a healing environment that supports psychological recovery. By integrating communal spaces, natural light, and connections to nature, the design aims to enhance the well-being of its residents.

5. Contextual Relationship:

The building harmoniously integrates with its surroundings, utilizing natural materials and terraced forms that echo the local landscape. The design respects the existing urban fabric while introducing innovative residential solutions.

P3: Details, Construction, and Diagrams Analysis

Diagram Interpretation:

The diagrams illustrate the combination of a standard gallery block with terraced housing, resulting in a south-facing terraced landscape and a north-facing academy area. This configuration creates a balance between private residential spaces and communal educational areas, fostering interaction and learning.

Floor-by-Floor Analysis

Level 1

Vocabulary Extraction:

- Entrance Hall
- Academy Area
- Care Units
- Communal Terrace
- Corridor Zone
- Stairwell
- Elevator

Quantity Estimation:

- Care Units: Approximately 7 to 8
- Communal Terrace: 1
- Corridor Zone: 1
- Stairwell: 1
- Elevator: 1

Spatial Relationship Descriptions:

- The entrance hall provides access to the academy area and residential units.
- Care units are arranged around the central courtyard, promoting interaction.
- The communal terrace is adjacent to the corridor zone, facilitating social engagement.

Overall Spatial Impression:

The ground floor integrates educational and residential functions, fostering a community-oriented environment that encourages interaction and learning.

Levels 2 to 5

Vocabulary Extraction:

- Care Units
- Communal Terrace
- Corridor Zone
- Stairwell
- Elevator

Quantity Estimation:

- Care Units: Approximately 7 to 8 per floor
- Communal Terrace: 1 per floor
- Corridor Zone: 1 per floor
- Stairwell: 1
- Elevator: 1

Spatial Relationship Descriptions:

- Care units are organized around the central courtyard on each floor.
- Communal terraces adjacent to corridor zones provide spaces for social interaction.
- The stairwell and elevator offer vertical circulation connecting all floors.

Overall Spatial Impression:

Upper floors maintain the community-centric design, with care units and communal spaces arranged to promote interaction while ensuring privacy.
