

CASE80 - Architectural Case Analysis Output

Number of Levels: 2

Level 1

1. Vocabulary Extraction

- Entrance hall
- Shared living area
- Dining area
- Kitchen
- Accessible toilet
- Staircase
- Elevator
- Outdoor terrace
- Storage room

2. Quantity Estimation

- Shared living area × 1
- Dining area × 1
- Kitchen × 1
- Accessible toilet × 2
- Staircase × 1
- Elevator × 1
- Outdoor terrace × 1
- Storage room × 2

3. Spatial Relationship Descriptions

- The entrance hall connects directly to the shared living area, forming a transitional zone that promotes welcome and interaction.
- The dining area is adjacent to the kitchen for service efficiency.
- Accessible toilets are distributed near primary public zones for easy access.
- Staircase and elevator are located centrally to provide vertical circulation.
- The outdoor terrace is connected to the shared space, allowing indoor-outdoor transition.

4. Overall Spatial Impression

The ground level emphasizes communal activity and functional clustering, organized around a central core and designed for accessibility and seamless spatial flow.

Level 2

1. Vocabulary Extraction

- Private living rooms
- Shared living area
- Accessible toilet
- Staircase
- Elevator
- Outdoor terrace

2. Quantity Estimation

- Private living rooms × 9
- Shared living area × 1
- Accessible toilet × 2
- Staircase × 1
- Elevator × 1
- Outdoor terrace × 1

3. Spatial Relationship Descriptions

- Private rooms are aligned along corridors, offering separation and privacy.
- A shared living area sits at the center to facilitate resident interaction.
- Toilets are placed at corridor ends to maximize coverage.
- Staircase and elevator provide consistent vertical circulation from Level 1.
- The terrace extends social space to the outdoors.

4. Overall Spatial Impression

The first floor supports semi-private living through a layout balancing autonomy and interaction, encouraging small-scale community life within a structured residential framework.
