

## CASE82 - Dr. George W. Davis Senior Residence and Senior Center

### PROJECT OUTPUT

Project Title: Dr. George W. Davis Senior Residence and Senior Center

Architect: David Baker Architects

Location: San Francisco, California

Total Levels Identified: 5 above-ground floors

Evidence Source: ArchDaily architectural drawings and renderings only

### LEVEL 1

#### Vocabulary Extraction:

- Entry lobby
- Community center
- Commercial kitchen
- Multipurpose classrooms
- Social lounge
- Fitness center
- Activity kitchen
- Salon

#### Quantity Estimation:

- Entry lobby 1
- Commercial kitchen 1
- Classrooms approx. 2 3
- Fitness center 1
- Activity kitchen 1
- Social lounge multiple
- Salon 1

#### Spatial Relationship Descriptions:

- The main entry opens to a centralized lobby adjoining the community center.
- Fitness and activity areas cluster near the southeast wing.
- Classroom zones are grouped adjacent to the community lounge for functional flexibility.
- Shared programs are arranged around circulation spines to enhance accessibility and flow.

#### Overall Spatial Impression:

## **CASE82 - Dr. George W. Davis Senior Residence and Senior Center**

Level 1 is programmed for vibrant public interaction and senior engagement, prioritizing social, health, and recreational functions with clear zoning for active and passive uses.

### **LEVEL 2**

#### **Vocabulary Extraction:**

- Residential units
- Informal lounge
- Laundry room
- Shared deck

#### **Quantity Estimation:**

- Residential units approx. 30
- Lounge 1
- Laundry room 1
- Deck 1

#### **Spatial Relationship Descriptions:**

- Units are arrayed around a central courtyard or atrium.
- The shared deck is accessible directly from circulation corridors.
- Lounge and laundry facilities are grouped for easy resident access.

#### **Overall Spatial Impression:**

Level 2 emphasizes residential comfort through repeated modular units, with communal amenities anchoring the floor to enhance social interactions.

### **LEVEL 3**

#### **Vocabulary Extraction:**

- Residential units
- Informal lounge
- Laundry room

#### **Quantity Estimation:**

- Residential units approx. 30
- Lounge 1
- Laundry room 1

#### **Spatial Relationship Descriptions:**

## **CASE82 - Dr. George W. Davis Senior Residence and Senior Center**

- Unit clusters mirror Level 2 with access to shared corridor lounges.
- Amenities are positioned for symmetrical access across the floor plate.

### **Overall Spatial Impression:**

Continues the modular, residential typology focused on repetition, rhythm, and localized social space per floor.

## **LEVEL 4**

### **Vocabulary Extraction:**

- Residential units
- Informal lounge
- Laundry room
- Shared deck

### **Quantity Estimation:**

- Residential units approx. 30
- Lounge 1
- Laundry room 1
- Deck 1

### **Spatial Relationship Descriptions:**

- Similar plan logic to Level 2; shared deck aligns with the atrium edge.
- Public-to-private gradient flows from shared circulation to unit interiors.

### **Overall Spatial Impression:**

Level 4 maintains community engagement through shared decks and social rooms while preserving private living modules.

## **LEVEL 5**

### **Vocabulary Extraction:**

- Residential units
- Informal lounge
- Laundry room

### **Quantity Estimation:**

- Residential units approx. 30
- Lounge 1
- Laundry room 1

## **CASE82 - Dr. George W. Davis Senior Residence and Senior Center**

### **Spatial Relationship Descriptions:**

- Final residential floor mirrors preceding levels with minimal variation.
- Private dwelling units continue clustering around shared access zones.

### **Overall Spatial Impression:**

Level 5 completes the vertical stacking strategy, maintaining consistent residential typology and reinforcing inter-floor coherence.
