

Building Floor Level Analysis Output

Project: Senior Residence / Meier + Associes Architectes

Total Levels: 3

Level 1

(1) Vocabulary Extraction

- Entrance hall
- Common areas
- Service rooms
- Courtyard
- Staircases
- Elevators

(2) Quantity Estimation

- Entrance hall × 1
- Common areas × approximately 2
- Service rooms × approximately 3
- Courtyard × 1
- Staircases × 2
- Elevators × 2

(3) Spatial Relationship Descriptions

- The entrance hall serves as a transition space leading to common and service areas.
- The central courtyard is surrounded by circulation cores, acting as the spatial anchor of the plan.
- Staircases and elevators are symmetrically placed to allow efficient vertical access.

(4) Overall Spatial Impression

The first level is designed around a communal and service-oriented program with strong integration of circulation and light through a central courtyard.

Level 2

(1) Vocabulary Extraction

- Residential units
- Corridors
- Staircases
- Elevators
- Balconies

(2) Quantity Estimation

- Residential units × approximately 8
- Corridors × 2
- Staircases × 2
- Elevators × 2
- Balconies × approximately 8

(3) Spatial Relationship Descriptions

- Residential units are arranged linearly along corridors.
- Each unit is connected to a private balcony.
- Staircases and elevators anchor both ends of the corridors, ensuring accessible movement.

(4) Overall Spatial Impression

The second level prioritizes residential privacy and quality of living, with spatial rhythms formed by corridor-unit-balcony sequences and regular vertical circulation points.

Level 3

(1) Vocabulary Extraction

- Residential units
- Corridors
- Staircases
- Elevators
- Balconies

(2) Quantity Estimation

- Residential units × approximately 8
- Corridors × 2
- Staircases × 2
- Elevators × 2
- Balconies × approximately 8

(3) Spatial Relationship Descriptions

- The layout mirrors that of Level 2, reinforcing modular spatial repetition.
- Balconies provide each unit with an outward-facing private zone.
- Vertical cores support continuity and ease of access.

(4) Overall Spatial Impression

Level 3 replicates the residential logic of the level below, consolidating the building's strategy of layered domesticity and modular efficiency.
