

PREPROCESS MODULE OUTPUT: ARMSTRONG PLACE SENIOR HOUSING

CASE FLOOR LEVEL SUMMARY

Total Number of Floors: 4 Floors (Level 1 - Level 4)

Level 1

Vocabulary Extraction

- Retail spaces
- Community spaces
- Residential units
- Courtyard
- Landscaped mews
- Stairwells
- Elevators
- Parking entrance

Quantity Estimation

- Stairwells × approximately 2
- Elevators × approximately 2
- Residential units × several
- Retail spaces × several
- Community spaces × several

Spatial Relationship Descriptions

- Retail and community spaces are located at street level, engaging with the public.
- Residential units are wrapped around the central courtyard.
- Landscaped mews connect the building to the surrounding neighborhood.
- Stairwells and elevators are distributed along corridors for efficient vertical circulation.

Overall Spatial Impression

The first level is organized as a semi-public interface offering commercial and community functions. It activates the streetscape while supporting inward-focused residential clustering around a central courtyard.

Level 2

Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Courtyard
- Balconies

Quantity Estimation

- Stairwells × approximately 2
- Elevators × approximately 2
- Residential units × multiple per corridor wing
- Balconies × one per unit

Spatial Relationship Descriptions

- Units are organized linearly around the courtyard, connected by corridors.
- Balconies project outward, establishing a rhythm on the building façade.
- Vertical circulation is accessible at corridor junctions for easy access.

Overall Spatial Impression

This level reinforces the courtyard-centered organization, facilitating community interaction and visual continuity with outdoor elements.

Level 3

Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Courtyard
- Balconies

Quantity Estimation

- Stairwells × approximately 2
- Elevators × approximately 2
- Residential units × multiple

- Balconies × one per unit

Spatial Relationship Descriptions

- The third level mirrors the second in spatial configuration.
- Private balconies align above lower floors to maintain consistent façade language.
- Courtyard openness is preserved to allow natural light penetration.

Overall Spatial Impression

This level sustains a modular residential typology while contributing to a sense of layered verticality across the building's inner-facing spaces.

Level 4

Vocabulary Extraction

- Residential units
- Corridors
- Stairwells
- Elevators
- Courtyard
- Balconies
- Green roofs

Quantity Estimation

- Stairwells × approximately 2
- Elevators × approximately 2
- Residential units × multiple
- Balconies × one per unit
- Green roofs × 1 major zone

Spatial Relationship Descriptions

- The fourth level follows the vertical logic of the lower floors.
- Green roofs crown the structure, offering ecological benefits and visual softness.
- Courtyard adjacency persists to promote daylight and airflow at the uppermost level.

Overall Spatial Impression

The top floor integrates sustainability features like green roofs while continuing the layered, community-focused residential strategy.
