

CASE92 - LEVEL SUMMARY OUTPUT

LEVEL -1

1. Vocabulary Extraction

- Car park
- Technical room

2. Quantity Estimation

- Car park × Undetermined
- Technical room × 1

3. Spatial Relationship Descriptions

- The underground level is occupied by a car park with adjoining technical service rooms that support the building infrastructure.

4. Overall Spatial Impression

This level serves functional purposes, housing utility and parking infrastructure separated from residential zones above.

Level 1

1. Vocabulary Extraction

- Housing units
- Day-care center
- Classrooms
- Administrative offices
- Technical/service zones
- Corridor
- Stairwell

- Elevator

2. Quantity Estimation

- Housing units × Undetermined
- Day-care center × 1
- Classrooms × 2-3 (within day-care center)
- Administrative offices × 1
- Stairwells × approx. 2
- Elevators × approx. 2

3. Spatial Relationship Descriptions

- Residential units and the day-care center are co-located but organized to separate private and communal/public uses.
- The community center zones are clustered toward the street edge, while residential corridors extend inward.
- Vertical circulation elements (stairs, elevators) are placed centrally for efficient access to upper floors.

4. Overall Spatial Impression

This level integrates social programming with residential access, providing a mixed-use community base layer.

Levels 2 to 6

1. Vocabulary Extraction

- Housing units
- Balcony
- Corridor

- Stairwell
- Elevator

2. Quantity Estimation

- Housing units × approx. 20 per floor
- Balcony × 1 per unit
- Stairwells × approx. 2
- Elevators × approx. 2

3. Spatial Relationship Descriptions

- Units are arranged linearly along central corridors.
- South-facing balconies are staggered and overlook a central courtyard, promoting daylight and interaction.
- Stairwells and elevators are symmetrically distributed at nodal points.

4. Overall Spatial Impression

The repetitive and rational layout on upper levels promotes efficient housing with enhanced environmental comfort through strategic balcony and corridor placement.

Overall Building Composition Insight

- Number of floors: 7 (6 above ground + 1 underground)
- Design Strategy: Two blocks connected by shared outdoor and community spaces (central courtyard), emphasizing sunlight orientation and modular housing logic.
- Community Focus: Integration of day-care and public services at ground level connects residents with neighborhood needs.
