Level 1 - Analysis

1. Vocabulary Extraction

- Housing units
- Common room
- Private gardens
- Entry terraces
- Private alleys
- Wooden fences
- Public square
- Benches
- Petanque field

2. Quantity Estimation

- Housing units × 19
- Common room × 1
- Private gardens × approx. 19
- Entry terraces × approx. 19
- Private alleys × several (undisclosed exact count)
- Wooden fences × several (enclosing unit areas)
- Public square × 1
- Benches × several
- Petanque field × 1

Architectural Analysis Report - CASE94

3. Spatial Relationship Descriptions

- Residential units are arrayed along internal private alleys, fostering a semi-private neighborhood atmosphere.
- Each unit includes a private garden and an entry terrace, separated from public space by timber fences for moderate privacy.
- The common room is placed at the edge of the building cluster, visually and spatially anchoring the development as it overlooks the public square.
- The square includes benches and a petanque field, facilitating community engagement and informal gathering.

4. Overall Spatial Impression

The design emphasizes a balance between privacy and community by organizing compact ground-level housing units with private outdoor spaces, complemented by a central common room and public square that act as social condensers.
