LEVEL STRUCTURE SUMMARY

LEVEL 1

Vocabulary Extraction

- Entrance Hall
- Multipurpose Room
- Healthcare Area
- Corridor
- Stairwell
- Courtyard

Quantity Estimation

- Entrance Hall 1
- Multipurpose Room approx. 2
- Healthcare Area 1
- Corridor approx. 2
- Stairwell approx. 2

Spatial Relationship Descriptions

- The entrance hall is centrally positioned and connects directly to the healthcare and multipurpose room.
- Corridors and stairwells frame a clear circulation system around the courtyard.
- Public service areas are clustered for accessibility and spatial coherence.

Overall Spatial Impression

Level 1 is planned as a communal and healthcare-oriented base layer, centering around a shared courtyard.

LEVEL 2

Vocabulary Extraction

- Residential Unit
- Balcony
- Corridor
- Stairwell

Quantity Estimation

- Residential Unit approx. 6
- Balcony approx. 6
- Corridor approx. 2
- Stairwell approx. 2

Spatial Relationship Descriptions

- Residential units line both sides of the corridors and each includes a balcony facing either the courtyard or the building.
- Stairwells at opposite ends provide vertical connectivity.

Overall Spatial Impression

This level is organized for residential privacy and community interaction, with each unit opening toward the courtyard.

LEVEL 3

Vocabulary Extraction

- Residential Unit
- Balcony
- Corridor
- Stairwell

Quantity Estimation

- Residential Unit approx. 6
- Balcony approx. 6

- Corridor approx. 2
- Stairwell approx. 2

Spatial Relationship Descriptions

- Similar to Level 2, units are placed symmetrically along the corridor spine, connected by stairwells.
- Each unit maintains private access to a balcony.

Overall Spatial Impression

Level 3 maintains the residential typology with mirrored spatial logic, ensuring continuity and vertical integration.

P2 Photographic/Render Analysis (Design Readings)

1. Design Vocabulary Extraction

- Perforated metal panel
- Glazed facade
- Wooden finish
- Sun shading device
- Green roof

2. Atmospheric Description

The atmosphere is contemporary yet warm, merging natural finishes with high transparency. Light filters through the facade, creating a soft, ambient glow.

3. Spatial Composition or Hierarchy

Spatial organization centers on a courtyard and expresses hierarchy through facade modulation and material transitions.

4. Design Intent Reading

The design seeks to balance social care, residential intimacy, and environmental consciousness through material and spatial choices.

5. Contextual Relationship (Optional)

The architecture resonates with its rural setting, employing wood, muted tones, and low profiles to blend with the landscape.

P3 Diagrams / Detail Design

1. Design Vocabulary Extraction

- Modular facade system
- Sustainable materials
- Natural ventilation strategy

2. Design Intent Reading

Detail drawings indicate a strategy for prefabrication, energy efficiency, and thermal comfort. Modularity is evident in the facade and structural elements.
